US Fish and Wildlife Service (USFWS):

Coordination with USFWS is required for every project that includes a federal nexus (federal funding, federal permits, etc.). Project information is entered into the USFWS Information for Planning and Consultation (IPaC) and an official species list is generated. Coordination with USFWS is only required if:

- IPaC identifies the presence of rusty patched bumble bee (high potential zone); or
- Project does not fall under USFWS Interim Guidance (2013) for other listed species (excludes Indiana bat, northern long-eared bat, and rusty patched bumble bee)

If the project does not qualify for the Rangewide Programmatic Agreement for Indiana bat and northern long-eared bat or is in a critical habitat for any species, contact INDOT to determine appropriate coordination needed with USFWS.

If the project is in southern and central Indiana counties and requires consultation with USFWS, contact the Bloomington Field Office.

If a project occupies, alters, or uses a Federal civil works project, USACE review and approval may be required. Examples of Federal civil works projects include dams and upstream reservoir, inland navigation channels, harbors, and levees. If a project may require a Section 408 civil works review, please contact the appropriate Corps' civil works district (see Attachment 4).

Additional early coordination recipients:

- Projects requiring early coordination may also need to coordinate with county highway departments, county commissioners, county health departments, universities/colleges, emergency services and historical societies that may have a specific interest.
- If a project involves Section 4(f) lands, then the official with jurisdiction (OWJ) over the Section 4(f) land should be contacted.
- If a project involves Section 6(f) lands, then coordination with IDNR Outdoor Recreation and National Park Service is required.
- If a project is within a corporate limit, then coordination with the mayor, town manager, city/town council, etc. should occur.

Notes:

- Most electronically submitted early coordination letters should not exceed 7 MB in size due to size limitations of resource agency e-mail.
- For EA and EIS level projects, early coordination recipients should be notified of the availability of the environmental document when the public notice of the public hearing is published to allow comment during the public comment period.
- If you have a project where you are coordinating with an MS4 Coordinator, you'll have to look up the MS4 Coordinator online. This can be done with a simple search engine query or "MS4 Coordinator [UAB name] Indiana". Please do not send early coordination letters to the IDEM MS4 Coordinator.
 - If a Red Flag Investigation recommends coordinating with an entity not specifically listed, send a resource specific correspondence to that entity. Focus it on the aspects that they would find important such as depth of excavation at a superfund site. They should not receive a generic early coordination letter.
