**Project team members will be available for questions following the conclusion of the formal public hearing.**

## JACKSON COUNTY BRIDGE NO. 197 OVER MCHARGUE DITCH

### Project Details

This project will replace the historic bridge over McHargue Ditch. The new proposed bridge is a three-span concrete slab bridge, increasing the bridge roadway width from 17.8 ft to 28 ft. The total project length is 415 ft. The bridge will be moved east to realign the channel to improve the hydraulics of the ditch and to avoid any work to the intersection.

The Jackson County Bridge #197 is listed on the National Register of Historic Places (NRHP) as a Non-Select bridge.
