Appendix 2 - PRELIMINARY JURISDICTIONAL DETERMINATION (PJD) FORM

BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR PJD: June 22, 2022

B. NAME AND ADDRESS OF PERSON REQUESTING PJD: Neal Bennett, Butler, Fairman, & Seufert, Inc., 8450 Westfield Blvd., Indianapolis, IN 46240

C. DISTRICT OFFICE, FILE NAME, AND NUMBER:

D. PROJECT LOCATION(S) AND BACKGROUND INFORMATION:

INDOT-Vincennes District has identified the need to address the deteriorated condition of the bridge #(158)58-47-03027 (National Bridge Inventory (NBI) #028000) over Silverville Creek. The project is located along SR 158, approximately 7.94 miles west of SR 458 in Lawrence County, Indiana. The project intends to remove and replace the existing bridge, which is a single span concrete stringer/multi-beam bridge. The existing structure, built 1938, is approximately 24 feet in length and an out-to-out width of 31.3 feet, and a height of 8.4 feet. The replacement bridge will be a three-sided, flat-topped box culvert, with a length of approximately 32-feet, an out-to-out width of 52-feet-6 inches, and a height of 9-feet 11-inches. Riprap will be installed (6-feet wide, 52-feet-6 inches long, 4-feet deep) in front of both vertical walls for scour prevention. Additional guardrail and shoulder work will be performed along SR 158, but the exact amount has yet to be determined. The overall project length will be approximately 500 feet.

(USE THE TABLE BELOW TO DOCUMENT MULTIPLE AQUATIC RESOURCES AND/OR AQUATIC RESOURCES AT DIFFERENT SITES)

| | State: Indiana | County/parish/borough: Lawrence | City: Silverville | | | | | |
|----|--|--|-------------------|--|--|--|--|--|
| | Center coordinates of Lat.: 38.85856°N | site (lat/long in degree decimal format): Long.: -86.674827°W | | | | | | |
| | Universal Transverse Mercator: UTM 16: 528213, 4301131 | | | | | | | |
| | Name of nearest water | erbody: Indian Creek | | | | | | |
| E. | REVIEW PERFORME Office (Desk) Dete | | _THAT APPLY): | | | | | |

TABLE OF AQUATIC RESOURCES IN REVIEW AREA WHICH "MAY BE" SUBJECT TO REGULATORY JURISDICTION.

| Site number | Latitude (decimal degrees) | Longitude (decimal degrees) | Estimated amount of aquatic resource in review area (acreage and linear feet, if applicable) | Type of aquatic resource (i.e., wetland vs. non-wetland waters) | Geographic authority to which the aquatic resource "may be" subject (i.e., Section 404 or Section 10/404) |
|---------------------------------|----------------------------------|-----------------------------------|--|---|---|
| Silverville Branch | 38.85856°N | -86.674827° W | 100 linear feet | Non-wetland waters | Section 404 |
| UNT to Silverville Branch | 38.513137°N | -86.402980°W | 75 linear feet | Non-wetland waters | Section 404 |
| | | | | | |

- The Corps of Engineers believes that there may be jurisdictional aquatic resources in the review area, and the requestor of this PJD is hereby advised of his or her option to request and obtain an approved JD (AJD) for that review area based on an informed decision after having discussed the various types of JDs and their characteristics and circumstances when they may be appropriate.
- 2) In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring "preconstruction notification" (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an AJD for the activity, the permit applicant is hereby made aware that: (1) the permit applicant has elected to seek a permit authorization based on a PJD, which does not make an official determination of jurisdictional aquatic resources; (2) the applicant has the option to request an AJD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an AJD could possibly result in less compensatory mitigation being required or different special conditions; (3) the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) undertaking any activity in reliance upon the subject permit authorization without requesting an AJD constitutes the applicant's acceptance of the use of the PJD; (6) accepting a permit authorization (e.g., signing a proffered individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a PJD constitutes agreement that all aquatic resources in the review area affected in any way by that activity will be treated as jurisdictional, and waives any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the applicant elects to use either an AJD or a PJD, the JD will be processed as soon as practicable. Further, an AJD, a proffered individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331. If, during an administrative appeal, it becomes appropriate to make an official determination whether geographic jurisdiction exists over aquatic resources in the review area, or to provide an official delineation of jurisdictional aquatic resources in the review area, the Corps will provide an AJD to accomplish that result, as soon as is practicable. This PJD finds that there "may be" waters of the U.S. and/or that there "may be" navigable waters of the U.S. on the subject review area, and identifies all aquatic features in the review area that could be affected by the proposed activity, based on the following information:

SUPPORTING DATA. Data reviewed for PJD (check all that apply)

Checked items should be included in subject file. Appropriately reference sources

below where indicated for all checked items: Maps, plans, plots or plat submitted by or on behalf of the PJD requestor: Map: Williams USGS 7.5-minute Quadrangle, Aerial and State Location Map Data sheets prepared/submitted by or on behalf of the PJD requestor. Office concurs with data sheets/delineation report. Office does not concur with data sheets/delineation report. Rationale: Data sheets prepared by the Corps: Corps navigable waters' study:_____ U.S. Geological Survey Hydrologic Atlas: NHD Silverville □ USGS NHD data. USGS 8 and 12 digit HUC maps. U.S. Geological Survey map(s). Cite scale & quad name: USGS Williams, IN 7.5-minute Quad National wetlands inventory map(s). Cite name: USFWS Lawrence County, IN Map ☐ State/local wetland inventory map(s):______ FEMA/FIRM maps: Larence County Photographs: Aerial (Name & Date): 2017 Orthophotography Other (Name & Date): Site Photos taken June 14, 2021 Previous determination(s). File no. and date of response letter: Other information (please specify):_____ IMPORTANT NOTE: The information recorded on this form has not necessarily been verified by the Corps and should not be relied upon for later jurisdictional determinations. 6/22/2022 Signature and date of Signature and date of Regulatory staff member person requesting PJD completing PJD (REQUIRED, unless obtaining the signature is impracticable)1

¹ Districts may establish timeframes for requestor to return signed PJD forms. If the requestor does not respond within the established time frame, the district may presume concurrence and no additional follow up is necessary prior to finalizing an action.

NOTICE OF SURVEY

RE: Topographic Survey for Replacement of SR 158 Bridge over Silverdale Creek, 7.94 miles West of SR 458, INDOT Des. No. 1800133, Lawrence County, Indiana

Dear Property Owner(s):

The Indiana Department of Transportation has selected Butler, Fairman and Seufert, Inc., to survey the referenced project. Courthouse records show that you are a property owner within the limits of the area where data will be collected for the project survey. It may be necessary for our employees to enter your property to complete this work. This is permitted by law per Indiana Code IC 8-23-7-26. If you have sold this property, or it is occupied by someone else, please let us know the name and address of the new owner or current occupant so we can contact them about the survey.

At this stage, we generally do not know what effect, if any, our project can eventually have on your property. If we determine later that your property is involved, we will contact you with additional information.

The survey work may include mapping the location of features such as trees, buildings, fences and drives, and obtaining ground elevations along with the identification and mapping of wetlands and historic resources, archaeological investigations (which may involve the survey, testing, or excavation of identified archaeological sites) and various other environmental studies. The information we obtain from the survey and studies is necessary for the proper planning and design of the transportation project. Please be assured of our sincere desire to cause you as little inconvenience as possible during this survey. If problems do occur, please contact our field crew or contact me at the telephone number or address shown above or the included e-mail address

Sincerely,

Mark W. Neal, P.S. mneal@bfsengr.com
