Prequalified signal contractors with bucket trucks for escorting trucks with height exceeding 15 feet

The Special Provisions for Vehicle Permitting (M-204S, <https://www.in.gov/dor/files/m204s.pdf>) provision #2 requires a permitted vehicle with height exceeding fifteen (15) feet to be accompanied by a prequalified contractor with a bucket truck for any permitted movement off an interstate. Only contractors who are prequalified with INDOT for work type E(a) or 0213 may escort these oversized loads while they are in Indiana.

To become prequalified with work type E(a), a company must complete the full prequalification process, including completing the application and providing the required financial information. For the work type 0213, Over-height Vehicle Escort, only general business information and the required certifications must be provided. Full information is available from <http://www.in.gov/indot/2740.htm>. INDOT's Prequalification Division will review the application and financial information, and will provide a response within 30 days. For assistance with prequalification, please contact Jose Murillo or Aggie Wagoner:

Jose Murillo
Prequalification Engineer
