Date of Request for Information Release: February 14th, 2014

SCOPE OF WORK

Office of Traffic Statistics

OBJECTIVE

This document is a Request for Information (RFI) regarding the uploading, quality checking, analysis and reporting of traffic count data.

INDOT is looking for information about Traffic Data Management Systems. The functionality that INDOT is interested in includes the ability for multiple users to upload data from a variety of traffic counters via the internet and perform an array of quality checks; the ability to automatically upload data from continuous data recorders (including weight) and perform an array of quality checks; development of annual factors and applying such factors to calculate Annual Average Daily Traffic; calculation of various statistics in support of project development, planning, and reporting to FHWA for the HPMS submittal; uploading of historical data; produce a variety of reports; interaction with Roadway Inventory system.

Presentation of information

INDOT would like interested parties to submit a technical brief discussing their technologies, and processes no later than March 21st, 2014.

INDOT reserves the right to request in-person discussions and possible demonstrations.
