

SR 37 at Wesley Chapel Road/CR 500 S and at Washboard Road Intersection Improvements in Lawrence County — DES 1900249 & 1900255

PROJECT DETAILS

The purpose of these projects is to lessen the number or severity of potential vehicle to vehicle conflicts and improve traffic movement and safety at SR 37 & Wesley Chapel Road and SR 37 & Washboard Road. The projects propose to construct a reduced conflict intersection (RCI) at each subject intersection on SR 37. The new intersections will restrict eastbound and westbound left-turn and through movement, but will allow left-turns from mainline SR 37 onto Wesley Chapel Road and Washboard Road. Turn lanes and median U-Turns will be constructed in the existing median along with underdrains and median drainage upgrades.

Lighting upgrades will also be installed at each intersection on both sides of SR 37. No permanent or temporary ROW will be required for this project. The maintenance of traffic plan includes phased lane closures on SR 37 for the duration of one construction season. Local roads may be used by local traffic. Access to all properties will be maintained throughout construction.

PROJECT INFORMATION:

Project Number: 1900249 & 1900255

Project Status: In Design

Anticipated Construction Start:
Spring 2025

Estimated Construction Cost: Approx. \$4,611,968.16
