| Greenwood       | 2421FFE | Seymour    | Johnson Co.  | Smith Valley Rd. | This project will involve the reconstruction and widening of Smith Valley Road within the project limits (Browning Drive to a point approximately 345 feet west of US 31). This project will address capacity and safety issues along Smith Valley Road, as well as reconstruct and improve the roadway. Pedestrian and bicycle facilities will be included in the form of 10' multiuse asphalt trail along both sides of the roadway. The Indianapolis MPO has included widening of Smith Valley Road in the 1st time period for improvements on the 2050 Metropolitan Transportation Plan (MTP). The City of Greenwood also recognizes the need to widen and improve Smith Valley Road and has completed a corridor wide preliminary engineer study to plan for, and guide, the implementation of these improvements. This preliminary engineering study included a traffic analysis, safety analysis, 10% design plans, construction estimates, and a preliminary environmental study including a Red Flag Investigation, Archaeological Report, and a Historic Property report. Greenwood intends to complete a corridor wide | kisting Roadway Widening          |   |       | FY 2026 STATE FY 2028 STATE                  | \$4,731,000                               |             |       | \$249,000                                 |          | \$2,241,000                       | 90%              | \$3,489,000                                 | \$3,489,000                                 |

| Hamilton County |         | Greenfield | Hamilton Co. | Olio Rd.         | The Olio Road and the 116th Street intersection is currently a four-leg intersection with two thru lanes, one right turn lane, and one left turn lane (with permitted and protected signal phasing) in the southbound and northbound directions. Eastbound approach has a protected left turn lane, a thru/protected left turn lane, and a right turn lane. The westbound approach has a protected left turn lane, a thru lane, and a right turn lane. There are also sidewalk or shared-use paths on all quadrants of the intersection. Based on existing traffic volumes, projected traffic growth pulled from the IMPOs Travel Demand Model, and existing safety concerns at the intersection, the Hamilton County Highway Department seeks funding to construct a roundabout at the Olio Road and 116th Street intersection. The roundabout would have three lanes on the northbound approach, two lanes on the southbound approach, two lanes on the eastbound approach with a southbound slip lane, and two lanes on the westbound approach. All existing sidewalks would be  | tersection or Intersection Groups |   |       | FY 2027 STATE                                | \$883,458                                 |             |       | \$98,162                                  |          | \$3,926,475                       | 80%              | \$6,274,504                                 | \$6,274,504                                 |

|       |         |                    |        | outside of the ramp to avoid conflict with the existing ITS infrastructure tower in the ramp infield. The ramp will be striped so that the two lanes of traffic from I-69 feed into the dual right turn lanes, with the left turn lanes developing to the left. Guardrail will be used along the ramp as it currently exists. A new sign cantilever will be installed over the ramp to provide advance lane indication arrows. The existing sidewalk on 116th Street will be maintained in a similar configuration. It is likely that a new traffic signal will need to be installed due to conflicts with the location of the existing strain poles and signal cabinet. Signal visibility improvements (backplates) are also recommended at the SB ramp terminal as part of this project. |---|----------------|
| Eagle Creek Greenway that starts at the  B&O Trail and ends at Washington St and the future IndyGo Blue Line BRT. From the  B&O Trail and Big Eagle Creek, the trail continues south on the eastern levee to  10th & Whitcomb, connecting to the existing on-street bikelanes on 10th Street. A full traffic count analysis will determine if we can remove travel lanes at this intersection to narrow the pedestrian  |                |
| crossing or provide a pedestrian refuge sland. The trail will then continue south along the levee to Lynhurst Drive bridge over Big Eagle Creek with a physically separated facility on the west side of the bridge. It will go under the south side of Lynhurst for a fully separated trail and proceed east along the levee on the south side of the creek to Vermont Street. At Vermont St., the trail will continue south on the levee, go under the Holt Road bridge, connect to Washington Street and Rockville Road, and the future Blue Line RRT. The current design of the IndyGo Blue Line provides a wide multi-use path on the south side of Washington Street  |                |

| Indianapolis DPW | 2310FFE | Greenfield | Marion Co.     | The project is a road diet and includes a parallel multi-use path. The purpose of the project is to rehabilitate the pavement of the existing arterial Madison Avenue, slow down traffic through the corridor, and improve pedestrian connectivity. A tenfoot-wide multi-use path will be along the east side of the roadway from Hanna Avenue to Southern Avenue, and between Southern Avenue and Pleasant Run Parkway North Drive, the landscaped median will accommodate a ten feet wide multi-use path. Between Southern Avenue and Pleasant Run Parkway North Drive, one interior lane in each direction will be removed. Between East Street and Southern Avenue, only one lane of the northbound lanes will be removed.  Between Hanna Avenue and East Street, lane widths will be narrowed to accommodate a two-way-left-turn-lane between the northbound and southbound lanes. | Indianapolis DPW | 2400602 | Greenfield | Marion Co. Key | The Nickel Plate Trail bridge over Keystone Ave. is located in Indianapolis, Indiana, Marion County, at approximately 49th Street and Keystone Avenue. The bridge will provide a fully separated pedestrian crossing for users of the Nickel Plate Trail to safely cross Keystone Avenue, a thoroughfare with AADT of 30,000-40,000 vehicles per day. The purpose of this project is to enhance safety in the pedestrian and bike network and reduce potential points of conflict between vehicular users and pedestrians and cyclists. | Indianapolis DPW | 2424FFE | Greenfield | Marion Co. | Post Road            | This project will add a cloud-based Advance Traffic Management System (ATMS) to North Post Rd. from 10th St to 36th St. containing eight traffic signals. This system will allow the Department to remotely monitor, diagnose, and modify traffic signals along the corridor. This ATMS will also have an adaptive feature where the system can automatically adjust and improve signal performance. This will be added to the City's existing cloud-based ATMS forming an ever-expanding connected network of traffic signals throughout the city. Dist:2.7     |   |    | FY 2027 STATE FY 2028 STATE | \$3,099,916              | \$1,377,700              | 80% | \$1,200               | 20% | \$1,377,700              | 80%        | \$2,152,716                | \$2,152,716<br>\$71,000    |
| Indianapolis DPW | 2425FFE | Greenfield | Marion Co. | South Emerson Avenue | This project will add a cloud-based Advance Traffic Management System (ATMS) to Emerson Ave from County Line Rd to Victory Dr. containing 14 traffic signals. This system will allow the Department to remotely monitor, diagnose, and modify traffic signals along the corridor. This ATMS will also have an adaptive feature where the system can automatically adjust and improve signal performance. This will be added to the City's existing cloud-based ATMS forming an ever-expanding connected network of traffic signals throughout the city. | IndyGo         | 2416FFE     | Greenfield     |                          | IndyGo is seeking to continue its federally-funded transit signal priority work through this application. Following a quantitative analysis that determined the highest priority intersections (as determined through a mix of metrics, including equity, travel time, and vehicle occupancy), routes were identified to install transit signal priority hardware to facilitate better transit travel time. For this application, TSP would be installed at key intersections for Route 10. Route 10 is one of the longest and highest-ridership routes in the IndyGo local transit network and would benefit greatly from improved travel time through transit signal priority. The project would include installation of the system at 51 intersections and the necessary software to operate the system. | Morgan County | 2002998 | Seymour                | Morgan Co.   | Old St Rd 37     | The Morgan County Board of Commissioners is requesting federal roadway funding for the reconstruction of Bridge 166 in Morgan County. The existing bridge is over Bluff Creek on Old St Rd 37 and is in badly need of repair due to neglect over several decades. It is on the Listing of Historical Bridges dues it being the oldest unaltered state design slab. The replacement of Bridge 166, as outlined in the application, is needed to allow Morgan County to provide adequate infrastructure for the local community in Morgan County. | Noblesville   | 2313FFE | Greenfield             | Hamilton Co. | Pleasant Street  | This application is for Phase 3 of the Pleasant Street project. Phase 3 constructs new alignment from SR 32/Hague Rd to River Rd. The roadway will be a 2-lane boulevard with a landscaped median, sidewalk on the south side, and an extension of the Midland Trace Trail on the north side. This is the last phase in the Pleasant Street corridor that will connect SR 32 to SR 37. The Pleasant Street project is a three (3) phase programmed project with the purpose of constructing a new east to west corridor through Noblesville that will ultimately connect SR 32 to SR 37 helping to relieve traffic congestion off of SR 32. The pleasant Street project will provide an alternate route over the White River, benefitting public safety, schools, businesses, commuters, and local residents. The Pleasant Street corridor has been studied by the City of Noblesville and Hamilton Co for over 20 years. The project is crucial to mobility in Noblesville and across Hamilton Co, especially considering the projected growth in both Westfield and Noblesville. Dist:.55 |                | N CE F    | Y 2026 STATI                    | \$2,11  | 16,100           | \$0                   | 0%         | \$2,116,100         | 100%       | \$0        | 0%       | \$28,189,250               | \$28,189,250               |

| Noblesville | 2003053 | Greenfield   | Hamilton Co. | Boden Road          | The intersection of Boden Road at E 166th Street will be constructed with a two lane roundabout. Concrete splitter islands, truck apron and concrete curb and gutter will be constructed on the roadway. A 10' wide HMA multi-use path will be constructed on both sides of the roadway. This project is an extension of previous City of Noblesville improvements to the south. This is one phase of a multi-phase project to widen Boden Road from Beauty Berry Lane to SR 38 in anticipation of current and future growth. In addition to significant residential growth along the corridor, an outdoor music venue ( Ruoff Mortgage Center) is on the southern terminus, and a 200 acre city park (Finch Creek) with a multi-sport fieldhouse (Finch Creek Fieldhouse) are located south of 166th Street. INDOT is currently in project development for a roundabout to be constructed at the northern terminus of the corridor, Boden Road and SR 38. The City of Noblesville is locally funding a two lane roundabout at the intersection of 156th Street for 2021 construction. | Noblesville | 2435FFE | Greenfield   | Hamilton Co. | Little Chicago Road | The existing T-intersection of Carrigan Road and Little Chicago Road consists of single-lane approaches with channelized right-turn lanes for the south and west approaches. The northbound left-turn movement for Little Chicago Road is stop-controlled with Carrigan Road operating under free-flow conditions. Little Chicago Road is a primary north/south corridor as indicated by the City's Thoroughfare Plan. As additional vacant land to the north is developed, traffic volumes at the intersection are expected to continue growing, further increasing the need for safety improvements to be implemented. While the stop-controlled northbound left-turn movement does experience increased delays during peak traffic periods, the ability for motorists to safely complete their desired turn movements at the intersection is a major concern for the City. Both northbound and westbound left-turn movements frequently conflict with free-flow eastbound traffic due to confusion as to whether vehicles traveling southeast toward the intersection intend to continue eastbound on Carrigan Road    |                           | Y | ROW | FY 2024 FY 2028 | STATE            | \$300,000                | \$270,000                | 90% | \$30,000              | 10%        | \$181,447   | 0%       | \$4,652,000                | \$4,652,000  |
| Noblesville | 2312FFE | Greenfield   | Hamilton Co. | Midland Trace Trail | This application is for Phase 2 of the Midland Trace Trail which will be constructed with the Pleasant Street project. Phase 2 constructs a 12' multi-use path from 10th Street to 19th Street. The Pleasant Street project is a three (3) phase programmed project with the purpose of constructing a new east to west corridor through Noblesville that will ultimately connect SR32 to SR37 helping to relieve traffic congestion off of SR32. The Pleasant Steet project will provide an alternate route over the White River, benefitting public safety, schools, businesses, commuters, and local residents. The Pleasant Street corridor has been studied by the City of Noblesville and Hamilton County for over 20 years. The project is crucial to mobility in Noblesville and across Hamilton County, especially considering the projected growth in both Westfield and Noblesville. Another major part of this project is the regional multiuse path connectivity that is being constructed with this project. The Midland Trace Trail will be extended from SR32 and Hague Road to SR37 at the completion of |                           | Y |     | FY 2028 FY 2026 |                  | \$3,720,553              | \$1,452,468<br>\$494,400 |     | \$815,617             | 36%        | \$1,452,468 | 80%      | \$3,150,144                | \$3,150,144  |

| Noblesville 2401637   | Greenfield     | Hamilton Co.  | Olio Road    | 2 lane roundabout. The purpose of the 156th Street and Olio Road project is to reduce the instance of severe injury crashes. The need is based on the crash history at the intersection and the need to accommodate future traffic growth. The crashes experienced at the intersection between years 2021 through 2023 is  | Intersection or Intersection Groups |         | FY 2027<br>FY 2027            |         | \$272,000<br>\$320,000                | \$244,800<br>\$0   | 90% \$27,2<br>0% \$320,0                  |            |                     | 0% \$340,000<br>0% \$4,220,000                 |              |

The most common crash type was right angle crashes. Dist:N/A  |                                     |         |                               |         |                                       |                    |   |            |                     |  |              |
| Plainfield 2436FFE    | Crawfordsville | Hendricks Co. | SR 267       | The Town is proposing to construct a single-lane roundabout at the intersection of Quaker Boulevard (formerly SR 267) and CR 750 S. (former SR 267 can show up as Black Rock Road, west of intersection) This intersection was jurisdictionally transferred to Hendricks County via an agreement in 2016. The Town of Plainfield has since annexed property adjacent to this intersection and is the acting authority over the intersection area, though an Interlocal Agreement with Hendricks County will be pursued if the project is selected for funding. A letter from the Hendricks County Commissioners was approved on 11/28/23 indicating their support for this improvement project. This letter is included as part of the support materials. Context for pursuing this project is that the current intersection poses a level of safety concern based upon historical crash records. The sweeping 90-degree turn with T-intersection allows for fairly high-speed travel where turning movements create vehicle conflicts. The intersection area also shows signs of drivers, either through confusion or |                                     | Y CE    | FY 2027 FY 2028               |         | \$3,200,000                           | 1 //               | 90% \$320,0                               | 00 10%     |                     | 0% \$4,220,000<br>0% \$6,420,000               |              |
