
Table of Contents

Chapter One - Hot Mix Asphalt Paving Inspection

Terminology.....	1-1
Prerequisites.....	1-1
Duties.....	1-2
Chain of Command.....	1-3
INDOT Project/District Level	
Central Office	
Contractor	
Communication.....	1-4
Accurate Communication	
The Three Key Activities of Accurate Communication	
Communication in Specific Situations	
When Instructing Your Crew	
Meetings	
Telephone Conversations	
Safety.....	1-14
Hazards	
Possible Injuries	
Safety Precautions	
Terms Related to Hot Mix Asphalt.....	1-20

Chapter Two - Mix Composition

Quality Control/Quality Assurance.....	2-1
Quality Control Plan	
Quality Assurance Procedures	
Materials	
Design Mix Formula/Job Mix Formula	
Hot Mix Asphalt (HMA).....	2-7
Quality Control	
Pay Item	
Design Mix Formula/Job Mix Formula	
Miscellaneous Mix Criteria	
Acceptance of Mixtures	
Stone Mastic Asphalt	2-8

Chapter Three -- Quality Assurance Procedures

Design Mix Formula.....	3-1
Lot/Sublot – QC/QA HMA and SMA.....	3-1
Types of Samples.....	3-3
Plate Samples	
Truck Samples	
Core Samples	
Appeal Samples	
Methods of Acceptance Sampling.....	3-5
Random Numbers	
Plate Samples	
Truck Sampling	
Core Sampling	
Adjustment Period – QC/QA HMA	3-17
Mixture Acceptance.....	3-17
QC/QA HMA	
HMA	
Pay Factors – QC/QA HMA (Dense Graded Mixture \geq 1 Lot).....	3-20
PWL-Mixture	
PWL-Density	
Pay Factors	
Adjustment Quantity – QC/QA HMA \geq 1 lot.....	3-31
Pay factors – QC/QA HMA (Dense Graded Mixture $<$ 1 Lot and Open Graded Mixtures).....	3-35
Mixture	
Density	
Adjustment Quantity –QC/QA HMA $<$ 1 Lot and Open Graded Mixtures	3-39
Mix Appeal – QC/QA HMA.....	3-42
Smoothness.....	3-43
Procedures	
Profilograph Exemptions	
Quality Assurance Adjustments	

Chapter Four – Quality Control Procedures

Contractor Personnel.....	4-1
QCP Manager	
QCP Site Manager	
Quality Control Technician	
Milling.....	4-2
Milling Plan	
Equipment	
Testing	
Process Balance.....	4-3

Transportation of Mixture.....	4-8
Truck Bed Cover	
Unloading	
Transfer Vehicles	
Paving.....	4-8
Paving Plan	
Material Feed System	
Grade and Slope	
Joints	
Asphalt Materials	
Joint Compaction.....	4-9
Materials Sampling and Testing.....	4-9
Mixture Properties	
Mixture Temperature at Paver	
Density	
Coring	
Smoothness	
Response to Test Results.....	4-10
Pavement Smoothness.....	4-10
Documentation.....	4-10
Quality Control Plan.....	4-10
QCP Approval	
QCP Addenda	

Chapter Five - Traffic Control

Basic Setup.....	5-1
Continual Inspection	5-7
Temporary Pavement Markings.....	5-7

Chapter Six - Preparation of Surface

Subgrade Treatment.....	6-1
Proofrolling.....	6-2
Milling.....	6-2
Patching.....	6-4
Wedge and Level.....	6-6
Base Widening.....	6-7
Cleaning.....	6-8
Tacking.....	6-9
Application	
Curing	

Chapter Seven - Mix Placement and Compaction

Weather Limitations.....	7-1
Asphalt Materials.....	7-2
Prime Coats	
Tack Coats	
Base Seals	
Fog Seals	
Joint Adhesives	
Distributor	
Mixture Transportation.....	7-4
Haul Trucks	
Material Transfer Vehicles	
Mix Temperature and Appearance.....	7-7
Placement of Mixture.....	7-8
Pavers	
Paver Operation	
Start-Up	
Alignment	
Grade and Slope Control	
Transverse Joints	
Longitudinal Joints	
Widening Machines	
Care and Cleaning of Pavers	
Paving Crew Responsibilities	
Compaction.....	7-28
Rollers	
Compaction of HMA	
Specified Rollers	
Plant Production – Number of Rollers	
Compaction Controlled by Density	
Widening	
Rolling Patterns	
Roller Operator Responsibilities	

Chapter Eight - Paving Troubleshooting

Problems Observed of the Mixture in the Trucks.....	8-1
Free Asphalt on Mix	
Free Dust on Mix	
Large Aggregate Uncoated	
Mixture Not Uniform	
Mixture Fat on One Side	
Mixture Flattens	
Mixture Burned	
Mixture Brown or Gray	
Mixture Too Fat	
Mixture Smokes	

Mixture Steams	
Mixture Appears Dull	
Problems Observed During Paving.....	8-6
Bleeding	
Transverse Joints – Improper Elevation Across Joint	
Transverse Joints – Rough Uneven Joint	
Screed Marks	
Surface Texture Fluctuation	
Tearing of Mat – Full Width	
Tearing of Mat – Center	
Tearing of Mat – Edge	
Thickness and Mat Quality Variations	
Wavy Surface – Long Waves	
Wavy Surface – Ripples, Short Waves	
Problems Observed During Compaction.....	8-19
Checking Under Roller	
Mat Shoving Ahead of Roller	
Roller Marks	
Unsatisfactory Compaction	

Chapter Nine - Thickness and Tonnage Control

Mixture Adjustment Factor.....	9-1
Checking Mat Thickness.....	9-2
Determining Mat Thickness	
Depth Checks	
Actual Rate of Spread.....	9-3
Stationing	
Weigh Tickets	
Computing Rates of Spread	

Chapter Ten – Seal Coat Placement

Types of Seal Coats.....	10-2
Quality Control Plan.....	10-3
Equipment.....	10-3
Distributor	
Chip Spreader	
Pneumatic-Tire Roller	
Rotary Power Broom	
Surface Preparation.....	10-6
Aggregate Surface	
Prime Coats	
HMA Surfaces	

Placement.....	10-7
Weather Limitations	
Traffic Control	
Application of Asphalt Material	
Application of Cover Aggregate	
Application of Fog Seal	
Application Rate Computations.....	10-13
Asphalt Material	
Cover Aggregate	
Fog Seal	

Appendix A – Indiana Test Methods

ITM 580	Sampling HMA Mixtures
ITM 588	Percent Within limits (PWL)
ITM 802	Random Sampling
ITM 803	Contractor Quality Control Plans
ITM 812	Macrottexture of Milled Pavement
ITM 912	Profilographs

Appendix B – 2014 Standard Specifications

Appendix C – Project Checklists

Pre-Start-Up Project safety Checklist A
Start-Up Work Zone Evaluation Checklist B
Daily Production Checklist C
Shut Down Safety Checklist D
Completed Project Maintenance Checklist E

Appendix D – Process Balance Forms

Mix Delivery Production Calculation Form
Paving Production Calculation Form
Compaction Production Calculation Form
