Statewide, 10.1% (618,000 acres) of soybean acres had living cover and cereal grains planted in them after harvest.

Living Covers Planted

% acres after soybean harvest
- ≤0%
- ≤7%
- ≤11%
- ≤15%
- ≤24%
- ≤45%
- No Data

Acreages are based on the 2018 NASS Cropland Data Layer.

*Windshield surveys were conducted between November 2018 and April 2019, and therefore may not reflect cover crops or cereal grains that emerged beyond said timeframe.
