Statewide, 80% of soybean acres (4,900,000) had residues and soils undisturbed during the fall and winter months.

% acres not tilled after bean harvest
- ≤0%
- ≤72%
- ≤85%
- ≤94%
- ≤100%
- No Data

Acreages are based on the 2018 NASS Cropland Data Layer.

*Windshield surveys were conducted between November 2018 and April 2019, and therefore do not reflect residues that are disturbed outside of said timeframe. See SPRING tillage transect results at https://www.in.gov/isda/2383.htm
