**2019 Spring Corn Residue Not Tilled**

**Statewide, 23% (1,230,000 acres) of harvested corn acres had residues and soils undisturbed**

**Residue not tilled**

<table>
<thead>
<tr>
<th>% of total corn acres not tilled</th>
<th>≤13%</th>
<th>≤25%</th>
<th>≤41%</th>
<th>≤65%</th>
<th>≤95%</th>
<th>No Data</th>
</tr>
</thead>
</table>

Acreages are based on the 2018 NASS Cropland Data Layer.

*Windshield surveys were conducted between March 2019 and June 2019, and therefore do not reflect residues that are disturbed outside of said timeframe. See FALL cover crop and tillage transect results at https://www.in.gov/isda/2383.htm*
