Statewide, 51% (3,125,000) of harvested soybean acres had residues soils undisturbed

Residue not tilled
acres of soybean residue not tilled
- \( \leq 12,682 \)
- \( \leq 28,830 \)
- \( \leq 42,841 \)
- \( \leq 61,108 \)
- \( \leq 77,052 \)
- <out of range>

Acreages are based on the 2018 NASS Cropland Data Layer.

*Windshield surveys were conducted between March 2019 and June 2019, and therefore do not reflect residues that are disturbed outside of said timeframe. See FALL cover crop and tillage transect results at https://www.in.gov/isda/2383.htm*
