

# HEPATITIS C

January 1, 2011 – December 31, 2011

**NOTE:**

Data are provisional and should be finalized later in 2011.

Hepatitis C (HCV) cases may reflect county of medical provider and not residence of individual due to reporting system limitations.

**State of Indiana:**

Reported in 2011 = 5,514

**Label definition:**

HCV Cases reported in 2011. Suspected, probable, and confirmed cases based on case investigations.

(\*) Counties with Indiana Department of Correction (IDOC) facilities.

NOTE: 2012 Hepatitis C data by county is currently unavailable but will be provided in future reports.
