Indiana Newborn Screening Tracking & Education Program (INSTEP)

User Guide
Welcome

Welcome to the Indiana Newborn Screening Tracking & Education Program (INSTEP)! This web-based application was developed by the Indiana State Department of Health (ISDH) Newborn Screening (NBS) Program in order to help ensure that all children born in Indiana receive the best possible care related to newborn screening. The mission of the Newborn Screening Program involves:

- Ensuring that every newborn in Indiana receives state-mandated screening;
- Ensuring that every infant with a presumptive positive or abnormal newborn screen receives appropriate, timely confirmatory testing and treatment and that the family receives genetic counseling; and
- Promoting public awareness and education about genetic conditions, genetic services, and newborn screening.

The Newborn Screening Program believes that the use of INSTEP will help achieve these goals by providing a centralized, web-based location for data entry and management. INSTEP will improve access to population-based, integrated, real-time data (including newborn screening results) for birthing facilities, health care providers, and NBS Program personnel. Data from INSTEP will also be used to enhance current standards of care for children diagnosed with newborn screening conditions.

This User Guide will provide you with guidance for the tasks that you will be performing in INSTEP. If you have additional questions about INSTEP, please contact Courtney Eddy, INSTEP Director, at CEddy@isdh.IN.gov or (317) 233 – 9260.

Thank you for your participation in this exciting new application!
## Table of Contents

**Registering for a Gateway Account** (for new Gateway users) 4 – 6

**Resetting your Gateway password** 7

**Accessing INSTEP**
- Requesting access to INSTEP (for EARS or other Gateway users) 8 – 11
- Accessing INSTEP from the Gateway 12
- Moving within INSTEP 13

**Monthly Summary Reports**
- Identifying your organization 14
- Opening an MSR / adding a new MSR 15
- Continuing an open MSR 16
- Adding children to MSR 17
- Editing demographic information for child & mother 18 – 21
- Associating a provider with a child’s exception
  - Selecting provider from “Frequently Used Provider” list 22 - 23
  - Associating a provider not in your “Frequently Used Provider” list 24 – 27
  - Editing provider contact information 28 – 31
  - Adding a new provider to INSTEP 32 – 34
- Entering exception codes (“Exception Entry”) 35 – 41
- Automatic population of transfer information 42 – 45
- Editing a declined transfer 46 – 47
- Utilizing NBS results to promote exceptions 48 – 53
- Entering MSR summary data (“Summary Entry”) 54 – 55
- Submitting your MSR 56
- Printing your MSR 57 – 59
- MSR Reports
  - MSR Submission Report 60 – 62
  - MSR Monthly Exception Report 63 – 65
- MSR Reports 66 – 68

**Sending a secure e-mail through INSTEP** 69 – 72

**Frequently asked questions (FAQs)** 73 – 76

**ISDH contact information** 77
Registering for a Gateway Account

New users who don’t have an existing ISDH Gateway account must register with the Gateway before access to INSTEP will be granted. Please make sure you have the Gateway security code that was e-mailed to you after your INSTEP MSR training class—you’ll need it to complete the registration process.

NOTE: You cannot share your user name or password with anyone within or outside your organization. Anyone who is interested in using INSTEP must attend an INSTEP training in person before he/she will be allowed access to INSTEP. Sharing your user name/password or signing up a non-trained person for an INSTEP account are direct violations of ISDH’s security guidelines.

In order to create an account within the Gateway:

1. Open your Internet browser and go to https://gateway.isdh.in.gov.
2. Click the “Create New Account” link underneath the user name/password boxes.
3. Enter the user name you would like to use, the Gateway security code, and your primary e-mail address. Click “Next.” The Gateway security code was provided in the e-mail sent after your INSTEP MSR training class.
4. In the Organization Information section:
   a. For non-ISDH users, select the Organization Type Hospitals – Acute Care and select your organization from the drop-down list. Click “Next.”
   b. For ISDH users, select the Organization Type Government – State and select Indiana State Department of Health. Click “Next.”

5. Complete the User Detail section by providing required information (password, first name, last name). You can leave the other fields blank.
   a. Passwords must be a minimum of 8 characters in length and must contain an upper case letter, a lower case letter, and one number. Please select a password that you will remember!!
   b. Click “Next.”
6. **Complete the “Contact Info” section.**
   a. The only required portion of this section is your primary telephone number. You can fill in the other fields or leave them blank.
   b. Click “Confirm and Create Account” at the bottom of the left-hand side of the screen.

7. **Click the “Create Account” button on the right-hand side.**

8. **Your request for access to INSTEP will be reviewed by a Gateway administrator. You will receive e-mail notification from the Gateway when your request has been approved.**
Resetting your Gateway Password

If you forget your Gateway password, follow these instructions to reset it:

1. Open your Internet browser and go to https://gateway.isdh.in.gov.
2. Click the “Recover Password” button on the toolbar.
3. Enter your Gateway user name and click the “Submit” button.
4. After submission, an e-mail with further instructions will be sent to you.
Requesting Access to INSTEP (for EARS or other Gateway Users)

Some INSTEP users may already have Gateway accounts because they use the Gateway to access EARS (the EHDI Alert Response System) or other ISDH web-based applications. Current Gateway users will need to request access to the INSTEP web-based application through the Gateway.

**NOTE:** You cannot share your user name or password with anyone within or outside your organization. Anyone who is interested in using INSTEP must attend a training in person before he/she will be allowed access to INSTEP. *Sharing your user name/password or signing up a non-trained person for an INSTEP account are direct violations of ISDH’s security guidelines.*

If you are a current Gateway user and wish to request access to INSTEP:

1. Log into the Gateway at [https://gateway.isdh.in.gov](https://gateway.isdh.in.gov).
2. On the Gateway home screen, click the “My Profile” link at the top of the page.
3. Click the “My Applications” tab.
4. Click the “Request Application Access” button.
5. Enter the Gateway security code. Click “Submit.”
   a. **NOTE:** The Gateway security code was e-mailed by ISDH after your INSTEP MSR training. If you have deleted this e-mail, please contact Courtney Eddy to request the code again.

6. **Your request for access to INSTEP will be reviewed by a Gateway administrator. You will receive e-mail notification from the Gateway when your request has been approved.**

7. Once your request for access to INSTEP is approved, you will have an active “INSTEP” tab on your Gateway home screen.
Accessing INSTEP from the ISDH Gateway

After you register with the ISDH Gateway and your access to the INSTEP application has been verified, you will be able to access INSTEP through the Gateway. In order to sign in to the INSTEP application:

1. Open your Internet browser and go to https://gateway.isdh.in.gov.
2. Log in with your Gateway user name and password.
3. Click the “INSTEP” button in the toolbar to access the INSTEP application.

4. You will see the INSTEP welcome screen.

5. All users will need to enter a “role security code” & agree to ISDH’s HIPAA policy when logging into INSTEP for the first time. NOTE: This is different from the Gateway security code for INSTEP! The role security code was included in the e-mail sent after your INSTEP training.
Moving within INSTEP

As you move between screens in INSTEP, you may find that you wish to move back to the previous screen.

INSTEP users must use the “back” button located at the bottom of INSTEP to move to the previous screen. Do NOT use the “back” arrow for your Internet browser. Using the “back” arrow of your Internet browser may prevent INSTEP from saving the information you enter and may also prevent INSTEP from being correctly displayed on your computer.
Monthly Summary Reports (MSRs)

Identifying Your Organization

Most users will **not have to select an affiliated organization**. Your primary organization will be assigned based on the information you enter during the Gateway registration process. However, **individuals who enter MSR information for more than one birthing facility** will be able to select the appropriate organization for a specific MSR by selecting the correct organization from the drop-down box located in the top middle of the INSTEP page.
Opening an MSR / adding a new MSR

1. In order to begin entering MSR data, hold your mouse cursor over the “Hospital MSR” tab at the top of the INSTEP welcome screen. A drop-down list with “Heelstick MSR” will appear.
   a. Hover your mouse over “Heelstick MSR.” Another menu will appear to the right.
   b. Click on “Exception Entry.”

   NOTE: If you do not have any exceptions for the month, please click “Summary Entry” and follow the steps below on the Summary Entry screen.

2. The MSR screen will show you a list of MSRs for a calendar year.
   a. To continue entering data for an open MSR, click the “Select” link on the right-hand side.
   b. To add a new MSR, click on the “Add New MSR” button in the lower right corner of the screen.
Continuing an open MSR

After you select an open MSR, INSTEP will display exceptions that have already been entered within the “Current Exceptions” section.

You may either enter a new exception (see section titled, “Entering New Exceptions”) or click “Edit” to edit an exception that was previously entered.
Adding Children to MSR

To add a child to the MSR, **type in the child’s Medical Record Number (MRN) and click “Search”** to look for a matching record within the INSTEP database.

**If (a) matching record(s) is/are identified**, INSTEP will display all possible matches. Click “Select” for the appropriate match.

**If there are no matches**, you will be automatically sent to the “Add a New Child” page.
Entering / Editing Demographic Information for Child & Mother

When you select an existing child’s record, the next INSTEP screen will give you the chance to edit and/or review the demographic information for a child and his/her mother.

**NOTE:** There are several pieces of demographic information that are helpful “behind the scenes” when attempting to match records within INSTEP. Useful data points are listed below. Points listed in **bold** are required:

- K-Number (the number in the lower right corner of the heelstick card)
- Child’s last name
- Child’s first name (if not known, leave this field blank and check the “Child’s first name is unknown” box)
- **Child’s date of birth (DOB)**
- Child’s time of birth
- Child’s sex (gender)
- Child’s birth order
- Mother’s medical record number (MRN)
- **Mother’s name (first & last)**
- Mother’s maiden name
- Mother’s DOB
- Mother’s address
- Mother’s phone number

If you are entering information for a **new child on this MSR**, please enter all available information. Items marked with a red exclamation point (!) are required.

**NOTE:** You must enter a telephone number for the child’s mother in order to complete the exception.
If you are viewing information for an existing child, please review the demographic information. If you need to update any information, click the “Edit Person Information” link for the child or mother and make changes as necessary.

NOTE: There are several pieces of demographic information that are helpful “behind the scenes” when attempting to match records within INSTEP. Useful data points are listed below. Points listed in **bold** are required:

- K-Number (the number in the lower right corner of the heelstick card)
- **Child’s last name**
- Child’s first name (if not known, leave this field blank and check the “Child’s first name is unknown” box)
- **Child’s date of birth (DOB)**
- Child’s time of birth
- Child’s sex (gender)
- Child’s birth order
- Mother’s medical record number (MRN)
- **Mother’s name (first & last)**
- Mother’s maiden name
- Mother’s DOB
- Mother’s address
- Mother’s phone number

These data points are extremely helpful in identifying accurate matches and preventing the creation of duplicate records. Please enter this information whenever possible!
Alternate method of editing/adding an address or phone number for the child’s mother:

Click the green “Show Others” button. The screen will expand to show you all available addresses or phone numbers associated with this child’s mother. You will also be able to enter a new address or phone number. Click “Save” when complete.

To enter a new address for the child’s mother, click the green “Show Others” arrow.

Enter the address and click “Save.”

Click here to enter a telephone number for the child’s mother.

Enter the mother’s phone number, select the type of phone number, and click “Save.”
**When entering dates:**

- Type the requested date into the text box in a MMDDYYYY format. You do **not** need to enter hyphens (-) or slashes (/) between numbers.

  **OR**

- Open a “calendar pop-up” by clicking on the calendar icon near the date field. This “pop-up” will allow you to scroll through the calendar year and select a date by clicking on it.
Selecting a Physician From “Frequently Used Provider” List

After you have entered demographic information for the child and the child’s mother, the next section of the Exception Entry screen will allow you to enter information for the child’s primary care provider.

Notes about Provider Entry in INSTEP

- INSTEP will allow you to “associate” (or list) more than one physician for each child you enter as an exception. However, you may only designate ONE associated physician as the child’s primary care provider (PCP).

- PCPs are labeled in INSTEP with a red heart.

- Other associated physicians (not the child’s PCP) are labeled in INSTEP with a gray heart.

- INSTEP has a feature called the “Frequently Used Provider” list, which saves the 10 providers you most recently added so you don’t have to search for physicians multiple times.
“Frequently Used Provider” feature
INSTEP has a “Frequently Used Provider” feature that will keep & display the names and addresses of the 10 providers you most recently used.

In order to associate a provider on your “Frequently Used Provider” list with the current exception you’re entering:
1. Click on the “Frequently Used Provider” drop-down menu.
2. Click on the name of the PCP that you wish to associate with this exception.
3. Click the “Add” button.

INSTEP will now display the physician’s name and contact information within the “Associated Providers” box. To designate this provider as the child’s PCP, click on the gray heart icon. The icon will turn red, indicating that the provider is the child’s PCP.

Continue to follow these instructions to add additional physicians from your “Frequently Used Providers” list to this child’s exception.
Searching for & Associating a Provider Not in “Frequently Used Provider” List

If the physician caring for this child is not already in your “Frequently Used Provider” list, you will need to search for him/her within INSTEP before you can add him/her as an associated provider for the child.

Notes about Provider Entry in INSTEP

• You can search for a provider using “partial” searches— for example, if you’re searching for David Smith, you can type “Smith,” “Smit,” “Smi,” “Sm,” or “S” into the “Last Name” search box. Partial searches can also be used in the “First Name” box.

• Remember, INSTEP will allow you to “associate” (or list) more than one physician for each child you enter as an exception. However, you may only designate ONE associated physician as the child’s primary care provider.

• PCPs are labeled in INSTEP with a red heart. Other associated physicians (not the child’s PCP) are labeled in INSTEP with a gray heart.

• INSTEP will save each physician you add within your “Frequently Used Provider” list, so you won’t have to search for physicians multiple times. See the previous section for more details on the “Frequently Used Provider” feature.
To associate a provider that is NOT in your “Frequently Used Provider” list to a child’s exception:

1. Click the “Search for a Provider” button.

2. INSTEP will display a search window. Enter the physician’s last name (entering the first name and/or city is optional) and click “Search.”

   **NOTE:** You can search for a provider using “partial” searches—for example, if you’re searching for David Smith, you can type “Smith,” “Smit,” “Smi,” “Sm,” or “S” into the “Last Name” search box. Partial searches can also be used in the “First Name” box.
3. INSTEP will display a list of all possible matches based on the name you entered.
   a. **If no match is found**, INSTEP will display a message below the search boxes that states, “There are no providers matching the current search criteria.”
      - Check the spelling of the name to try again.
      - Try searching for the provider using his/her last name and the first LETTER of his/her first name.
      - Try searching for the provider using the first letter of his/her last name ONLY.
   
   If you still cannot find a match, please skip to the section below titled, “Adding a Brand-New Provider to INSTEP.”

   ![Search Providers](image1)

   ![Search Providers](image2)

   b. **If a match is found**, INSTEP will display a grid that shows all the available results.
      - If a physician has multiple addresses, *each address will display on a separate line.*
      - If a physician has multiple phone numbers, they will appear in the drop-down box in the “Phone” column.
c. Identify the address you wish to have associated with this provider’s listing in INSTEP.

d. **Within the address line you wish to associate**, click on the “Phone” drop-down menu. Click on the phone number you wish to have associated with this provider’s listing.

e. If this provider is the child’s PCP, click on the gray heart in the “PCP?” column. The heart will turn red, indicating that this provider is the child’s primary care provider.

f. Click the “Associate” link **within the address line you wish to associate**.
Editing Provider Contact Information

INSTEP allows users to edit/update existing addresses & phone numbers for providers.

**NOTE:** INSTEP users should be cautious when editing an address or phone number—any changes you make will affect everyone that uses INSTEP!

*If you don’t see the address you need for your provider, don’t edit. Instead, add a new address!* See step 5 below for more details.

To *edit* an existing office address or phone number of a provider:

1. **Click on the “Edit” link** within the provider’s information. You can edit information for a provider that is already associated with a child or within your provider search results.

2. INSTEP will refresh & display text boxes that you can use to edit/update the provider’s address & phone number as needed.

*Remember, if you don’t see the address you need for a provider, don’t edit! Instead, add a new address or phone number. See step 5 below for more details.*
3. Update the provider’s address and/or phone number as needed.
4. When you have finished editing the provider’s contact information, click the “Update Provider” button.

5. If you do not see the address you need for a provider, click on the “Add a brand-new address” link above the text boxes.
6. INSTEP will refresh & display blank text boxes. Type in the new address information.

7. To select a phone number for the new address, you can either:
   a. Select an existing phone number from the “Phone” drop-down menu
   OR
   b. Select “NEW” from the “Phone” drop-down menu and type in the new phone number.

8. When you are finished with this new address & its phone number, click the “Add New Address to Provider” button.
9. INSTEP will refresh & display the new address in the “Associated Providers” box.

10. If this provider is the child’s PCP, click on the gray heart in the “PCP?” column. The heart will turn red, indicating that this provider is the child’s PCP.
Adding a New Provider to INSTEP

If you have searched for a provider and cannot find a record of him/her in INSTEP, you can add him/her to the system.

**NOTE:** Users *must* search for a provider before they are allowed to add a new provider to INSTEP. This is in place to avoid having multiple duplicated listings for the same provider.

To add a brand-new provider to INSTEP

1. Click the “Add New Provider” button within the search fields.
2. INSTEP will refresh & display text boxes you can use to enter the provider’s information.

**NOTE:** When entering information for a brand-new provider, *you must include the provider’s address & phone number.*

Optional fields include the following:
- Provider’s middle initial
- Provider’s license number

While these fields are optional, entering this information will help INSTEP create a complete & accurate record for this provider. *If you have this information, please take the time to enter it!*

3. When you are finished entering the provider’s information, click the “Save New Provider” button.
4. INSTEP will refresh & display the provider’s information within the “Search Provider” box.
   a. If this provider is the child’s PCP, click on the gray heart in the “PCP?” column. The heart will turn red, indicating that this provider is the child’s primary care provider.
5. Click the “Associate” link.
Entering Exception Codes (Exception Entry)

The final section of the INSTEP Exception Entry screen is where you enter the actual exception information for this child. You will need to complete all of the following items to submit an exception:

1. **Transfer detail** – This section will allow you to enter “Transferred Out” or “Transferred In” information. The default setting for this box is “Not Transferred”—INSTEP users will need to select one of the options below.
   
a. **If a child was not transferred in/out**, leave the selection as “Not Transferred” and go to step 2.
   
b. **If a child was transferred out of your facility before he/she received a valid initial newborn screen**, select “Transferred Out” from the drop-down menu and then select the name of the facility where the child was transferred.

**NOTE:** You do NOT need to include children who were transferred to another facility after receiving a valid initial newborn screen. Once a child has had his/her initial newborn screen, you do not need to report any additional transfers for him/her.
c. If a child was transferred into your facility before he/she received a valid initial newborn screen, select “Transferred In” from the drop-down menu and then select the name of the facility that transferred the child to your facility.

**NOTE:** Again, you do NOT need to include children who were transferred to your facility after receiving a valid initial newborn screen. Once a child has had his/her initial newborn screen, you do not need to report him/her as an exception.

2. **Exception Type** – This section allows you to enter the appropriate exception code for this child. Descriptions of each exception code follow the diagram below.

a. **Transfer only** – This child was transferred into / out of your facility before he/she received a valid initial newborn screen. If you select this exception code, please enter the date of the transfer and go to step 3.
b. **Finally screened** – This child was either:

i. A “hold-over” from the previous month (“Discharged without NBS,” “NICU,” or “Initial Screen Next Month” exception codes on the previous MSR), but received his/her initial newborn screen during this calendar month

OR

ii. A child who was transferred into your facility & received a valid initial newborn screen before you submitted your MSR.

*If you select this exception code, please enter the date of the initial newborn screen and go to step 3.*

c. **NICU** – This child did not receive a newborn screen during this month because he/she is in the NICU. *If you select this exception code, no additional action is required. This child will be a “hold-over” and need to be promoted on next month’s MSR. Please go to step 3.*

d. **Initial Screen Next Month** – This child was born at the end of the calendar month, but did NOT receive his/her initial newborn screen before your facility submitted the MSR.

**Examples**

- Child born on 10/31, received NBS on 11/2; facility submitted MSR on 11/15 – This child is considered a “normal screen” and should **NOT** be reported on your facility’s MSR.

- Child born on 10/31, received NBS on 11/4; **facility submitted MSR on 11/1** – This child should be reported as an “Initial Screen Next Month” exception because he/she didn’t receive NBS before your facility submitted the MSR. *If you select this exception code, no additional action is required. This child will be a “hold-over” and need to be promoted on next month’s MSR. Please go to step 3.*

e. **Deceased** – This child did not receive an initial newborn screen because he/she is deceased. *If you select this exception code, please enter the child’s date of death and then go to step 3.*
f. **Religious Refusal** – This child did not receive a newborn screen because his/her parents completed and signed a Religious Waiver declining the screen. *If you select this exception code, please perform the following actions:*

i. **Enter the date the Religious Waiver was completed in the “Date” box.**

ii. **NOTE:** INSTEP users can upload and attach a digital copy of the signed Religious Waiver. To do this, please scan the Religious Waiver into a PDF, Microsoft Word, Microsoft Excel, or image file format. *Accepted file types include the following: pdf, tiff, bmp, gif, png, doc, xls, docx,xlsx, xps, jpg, jpeg.***

iii. **Click “Browse” to select the appropriate file to upload.** After selecting the appropriate file, click “Open.”
iv. Click “Upload” to upload the scanned Religious Waiver for this child.
v. The screen will refresh and say, “Attachment uploaded successfully.” Repeat these steps if you need to attach additional files for this child. When you have uploaded all files, go to step 3.

**NOTE:** Once you upload a file, you must save the exception in order for INSTEP to display the names of the file(s) you have uploaded.

g. **Discharged without Newborn Screen (NBS)** – This child did not receive an initial newborn screen due to an error on the part of the birthing facility (e.g., discharged from the hospital before he/she received an initial newborn screen, MRN error) or unauthorized parent refusal (e.g., parents refused NBS but did not complete/sign Religious Waiver). If you select this exception, please enter the date that the child was discharged and go to step 3. **INSTEP will also give you the option of uploading electronic copies of any documentation related to this child’s discharge (see pages 32 – 34 for more detailed instructions on how to upload files into INSTEP).** This child will be a “hold-over” and need to be promoted on next month’s MSR.

**NOTE:** Any and all children who are discharged from your facility without a newborn screen must be immediately reported by telephone to the ISDH Newborn Screening Program!
3. **Notes** – This section will allow you to enter detailed comments pertaining to this child’s exception(s). Examples: “Called child’s PCP on 3/1/11 to alert office that this child requires NBS. PCP stated that child has appointment tomorrow; PCP will collect NBS at this appointment.”

When you have completed all three sections, click “Save Exception” to save this child’s information and return to the MSR screen. If your exception was saved, you will see the child’s name appear in the “Current Exceptions” section. You will also see the blue “success” banner at the top of your INSTEP screen. Repeat the steps above for all children on this month’s MSR.
Automatic Population of Transfer Information

INSTEP has the capability to “pre-populate” or “automatically” populate transfer information for birthing facilities who receive children who are transferred from another facility.

**NOTE:** All MSR users *must* use INSTEP throughout the month in order for this feature to work. If all users submit their MSRs on the 14th of the following month, this feature will not function correctly—users at the receiving facilities will not have any transfers pre-populated. *As a reminder, please report all exceptions within 5 days of the child’s birth or within 5 days of the exception.*

**Example:**

1. Parkview Hospital reports a child as being transferred to Adams Memorial Hospital on the August 2011 MSR.

![Exception Details Form](image)

**Enter Exception Details**
- **Transfer Detail:** Transferred Out
- **Organization name:** Adams Memorial Hospital
- **Exception Type:** Transfer Only
- **Date:** 8/4/2011
2. Adams Memorial’s MSR user logs into INSTEP to complete his/her August 2011 MSR. INSTEP will “pre-populate” the MSR with any children who have been reported as transferred to that facility. **Children who are reported as transferred to your facility will be highlighted in blue on your MSR. These children will appear in the “Unresolved Holdovers” section of your Exception Entry list.**

3. If you hover over the “Accept” link, INSTEP will display a small pop-up that will tell you which facility reported the child as being transferred to your facility.
4. Users have two options:
   a. **Accept:** If the child has been transferred to your facility, click “Accept.” INSTEP will take you to the Exception Entry screen.
      i. INSTEP will pre-populate the transfer code as “Transferred In” & automatically complete the “Organization Name” field with your facility’s name.
      ii. Enter your facility’s MRN for the child.
      iii. Update the “Exception Type” as needed. For example, if the child has received his/her initial NBS, you will select “Finally Screened.” **See the “Using Lab Results to Update an Exception” section for more information.**
      iv. Enter a date (e.g., date of NBS) if applicable.
      v. Click “Save Exception” when finished.
      vi. Repeat these steps for any additional transfers you are accepting.
b. **Decline:** If the child is not at your facility, click “Decline.” INSTEP will remove the child from your MSR & re-assign this child’s exception to his/her birthing facility. *See “Editing a Declined Transfer” section for more information.*

---

**NOTE:** You must accept or decline all transfers before you can close your MSR.
Editing a Declined Transfer

When a hospital declines a reported transfer, INSTEP re-assigns that child’s exception to his/her birthing facility. *Children whose transfers are declined will be highlighted in red on your MSR. These children will appear in the “Unresolved Holdovers” section of your Exception Entry list.*

Hover your mouse over the “Edit Declined Transfer” link to see which facility declined the transfer.

In order to correct the declined transfer:

1. Click the “Edit Declined Transfer” link. INSTEP will take you to the Exception Entry screen for this child.
2. You can correct any information necessary. *Most of the time, the transfer will be declined because an MSR user accidentally selected the wrong facility name within “Organization Name.”*
   a. For example, if an MSR user accidentally selected “Adams Memorial Hospital” instead of “Auburn Birthing Center,” Adams Memorial would decline the transfer.
   b. The exception would be re-assigned to the child’s birthing facility, which would edit the declined transfer so that the organization name correctly read “Auburn Birthing Center.”
3. Click “Save Exception” when you are finished editing the declined transfer.
   a. INSTEP will re-assign the transfer to the new organization.
4. Repeat for all other declined transfers on your MSR.

**NOTE:** Remember, all MSR users must use INSTEP throughout the month in order for this feature to work. If all users submit their MSRs on the 14th of the following month, this feature will not function correctly—users at the receiving facilities will not have any transfers pre-populated. *As a reminder, please report all exceptions within 5 days of the child’s birth or within 5 days of the exception.*

**NOTE:** You must edit all declined transfers before you can close your MSR. However, if a facility declines a transfer from your facility after your MSR is closed, INSTEP will assign the child’s transfer to the INSTEP Director for follow-up.
Utilizing NBS Results to Promote Exceptions

INSTEP integrates newborn screening (NBS) laboratory results with reported exceptions so that you can quickly see:

- If an initial newborn screen has been performed,
- If the child has a valid newborn screen on file, and
- If the results of the newborn screen were normal or abnormal.

As you save exceptions on your MSR, INSTEP will attempt to match the child you reported to his/her newborn screening results within the larger ISDH database. *Similarly, if a child is reported as being transferred to your facility OR is a holdover from a previous MSR, INSTEP will display lab results for the child if they are available.*

INSTEP uses the following icons to display results:

- **Green checkmark:** Valid, normal NBS lab results
- **Orange checkmark:** Valid, abnormal NBS lab results
- **Red “X”:** Invalid NBS lab results
- **Gray “X”:** No NBS lab results available

You can hover your mouse over any of these icons for a “pop-up” that gives more detailed information about what the icon represents.
Reviewing NBS results on file for the child

The NBS lab data you see in INSTEP can be utilized to review the NBS results on file for the child.

In order to view detailed information about any lab results on file (valid/invalid and normal/abnormal), click on the NBS Lab Data icon for the child.

INSTEP will display the NBS Lab Data “pop-up,” which will show you additional information about that child’s NBS results, including:

1. **Requisition number** for each NBS sample that has been collected & processed for this child

2. **Date of collection** for each NBS sample that has been collected & processed

3. **Name of the facility that submitted** each NBS sample

4. There are also three indicators that the Newborn Screening Laboratory utilizes to determine whether an individual NBS sample was valid or invalid. These indicators are:
   a. **Specimen Quality:** Was the specimen collected without any quality flags (such as oversaturation, uneven saturation, QNS, etc.)?
   b. **Age > 48 Hours:** Was the specimen collected after the child was at least 48 hours old?
   c. **Feeding Time:** Was the specimen collected after the child has been on protein feed for at least 24 hours?

5. **Results:** Were the results of this sample normal or abnormal? *Results will only be displayed for valid NBS specimens.*

See the next page for examples of how NBS lab results are displayed within INSTEP.
**Valid, normal NBS results:** You will see green checkmarks for all of the quality indicators, plus a green checkmark for “Results.”

![Lab Data](image1.png)

**Valid, abnormal NBS results:** You will see green checkmarks for the three quality indicators and a red “X” for “Results.”

![Lab Data](image2.png)

**Invalid NBS results:** You will see a red “X” for at least one of the three quality indicators. In this example, the child’s NBS sample was invalid because the specimen was collected before the child was 48 hours old.

![Lab Data](image3.png)
Promoting an exception using NBS lab results

The NBS lab data you see in INSTEP can also be used to promote exceptions to “Finally Screened.”

**NOTE:** Exceptions can be promoted from valid, normal NBS results *OR* from valid, abnormal NBS results.

Remember, ISDH is charged with ensuring that every child receives a valid initial screen. Children whose lab results are abnormal are receiving appropriate follow-up services, but that is outside the scope of the MSR portion of INSTEP.

You can promote an exception based on lab data in two ways:

1. **Promoting an exception directly on the MSR Exception Entry screen**
   a. If a child has valid NBS results on file in INSTEP, click on the green checkmark (for valid, normal results) or orange checkmark (for valid, abnormal results) to open the “NBS Lab Data” pop-up.
   b. Within the NBS Lab Data pop-up, you will see a button that says, “Update Exception From Lab Results.” Click this button to promote this child’s exception to “Finally Screened.”

**NOTE:** The “Update Exception From Lab Results” button can only be used if valid NBS results are on file. If a child has invalid results, you will see this button, but you will not be able to click it.
c. INSTEP will refresh & re-display the MSR Exception Entry page. The child whose exception you just promoted will now be displayed with a “Finally Screened” exception.

d. If you promote an exception using lab results, INSTEP will also automatically include a notation in the “Notes” section of the child’s Exception Entry screen for the child that reads, “Exception Updated by Lab Data.” **Do not delete this note!**
2. **Promoting an exception from a child’s Exception Entry screen**

   a. If a child has valid NBS results on file, you can also click the “Edit” link to open a child’s Exception Entry screen.

   b. INSTEP will display the child’s Exception Entry page. To update the exception:
      i. Scroll to the bottom of the Exception Entry screen.
      ii. Change the Exception Type to “Finally Screened.”
      iii. Enter the date that the child’s NBS was performed.
      iv. Click “Save Exception.”
      v. INSTEP will not automatically include a note within the “Notes” section to state that the exception was promoted from NBS lab data.
Entering MSR Summary Data ("Summary Entry")

After you have entered all exceptions for this month’s MSR and are ready to enter your MSR Summary data, hover your mouse over the “Hospital MSR” tab at the top of the INSTEP screen. A drop-down list will appear. Click on “Summary Entry.”

The screen will refresh with a list of open MSRs for your organization. Select the appropriate MSR to enter summary data.
1. The screen will refresh and display the MSR Summary Data form. **Enter the following information:**
   a. Total number of live births at your facility this month
   b. Total number of home births that received an initial newborn screen at your facility this month
   c. Total number of walk-in patients who received an initial newborn screen at your facility this month

2. The number of exceptions reported and the number of screens will be automatically calculated based on the data that you provide.

**NOTE:** To move between the summary data fields, click your mouse on each box OR use the “Tab” key on your keyboard. INSTEP will not calculate the number of screens performed each month until you have entered all required summary data.

3. **NOTE:** If you need to come back later to complete entering summary data for this MSR, click “Save.” This MSR will be saved within the INSTEP MSR Summary Entry section until you come back.
Submitting Your MSR

When you have correctly entered all information and are ready to complete this MSR, click “Save and Close.” The screen will refresh and show you the date and time that you submitted the MSR.

Do NOT submit your MSR until you are completely finished!

Once you click “Save and Close,” your MSR has been submitted to ISDH, and you cannot update or change it. If you wish to return to your MSR at a later date, please click “Save” – do NOT click “Save and Close” until you are ready to submit to ISDH!!

MSRs are due to ISDH by 5 pm on the first business day after the 14th of the month.

Typically, the due date will be the 15th of the month.
If the 15th falls on a weekend, MSRs are due to ISDH by 5 pm the following Monday.
Printing Your MSR

INSTEP allows you to print a copy of each month’s MSR for your facility’s records. **NOTE:** MSRs print in a read-only PDF format. INSTEP users are not able to alter the MSR or printout in any fashion.

You can print an MSR from the MSR Monthly Exception Report screen or from the Exception Entry screen. **NOTE:** For information on printing an MSR from the MSR Monthly Exception Report screen, please see the “MSR Reports” section of this User Guide.

**To print an MSR from the Exception Entry screen:**

1. Log into INSTEP and go to the Exception Entry screen by hovering your mouse over the “Hospital MSR” menu and clicking “Exception Entry.”

2. Click on the “Print” link next to the name of the MSR you want to print.
3. **INSTEP will automatically take you to the MSR Monthly Exception Report screen and display the selected MSR** (with the correct month and year). The MSR will be displayed in the bottom half of your screen.
4. **To print a hard (paper) copy of the MSR, scroll to the bottom of the screen and hover your mouse over the MSR report.** You should see the Adobe Acrobat toolbar appear.

5. **Click on the printer icon** to print the report.

6. To print another MSR, change the date fields (month and year) at the top of the MSR Monthly Exception Report screen, then click “Run.” Repeat this step as needed to print additional reports.
MSR Reports

INSTEP allows users to run specific reports so that each facility can track its progress and performance. To access the INSTEP MSR Reports:

1. Hover your mouse over the “Hospital MSR” menu.
2. Click “MSR Reports” from the menu.
3. INSTEP will display the Hospital MSR Reports page.

NOTE: Each MSR Report page contains a button in the upper-right corner that reads, “Return to Hospital MSR Reports page.” You can click this button from any of the MSR Reports screens to return to the Hospital MSR Reports page and select another MSR report.
4. Select one of the following reports to run:
   a. **MSR Submission Report**: Includes the following items:
      i. A grid that lists:
         1. Name of facility
         2. Selected year
         3. Name of person who created each MSR within the selected year
         4. Date each MSR was created
         5. Date each MSR was closed
         6. Status of all MSRs for a selected year (e.g., whether each MSR was submitted on time/late or is missing/open)
      ii. A grid that summarizes the status (e.g., how many MSRs within the selected year were submitted on time? How many MSRs were late?)

   See page 46 for an example of an MSR Submission Report.

   b. **MSR Monthly Exception Report**: Includes the following items:
      i. Facility name
      ii. Month/year of MSR
      iii. Name of person who created MSR
      iv. Date MSR was opened in INSTEP
      v. Date MSR was closed in INSTEP
      vi. List of individual exceptions reported for that month. For each exception, this report displays:
         1. PID (person unique identifier)
         2. Infant’s name
         3. Infant’s date of birth
         4. Exception code assigned to that infant
         5. Infant’s Medical Record Number (MRN)
      vii. List of summary data submitted for that month (as submitted by your facility)

   See page 49 for an example of an MSR Monthly Exception Report.
MSR Submission Report

To view and/or print an MSR Submission Report:

1. **Click the “MSR Submission Report” button** on the Hospital MSR Reports page of INSTEP.
2. On the “MSR Submission Report” page, **check the boxes of the status(es) you wish to view** on this report.
   a. INSTEP defaults to include all four statuses (on time, late, missing, and open) on each MSR Submission Report.
   b. If you do not wish to view one or more of these statuses, uncheck the box next to the status you wish to remove.
3. **Select the year** of the MSR you wish to view and/or print from the drop-down menu labeled “Year.”
4. **Click “Run.”**
5. INSTEP will refresh & display the selected MSR Submission Report in the lower half of the screen.
6. **To print a hard (paper) copy of the report, scroll to the bottom of the screen and hover your mouse over the report.** You should see the Adobe Acrobat toolbar appear.

7. **Click on the printer icon** to print the report.

INSTEP User Guide 65
**MSR Monthly Exception Report**

To view and/or print an MSR Monthly Exception Report:

1. **Click the “MSR Monthly Exception Report” button** on the Hospital MSR Reports page of INSTEP.
2. **Select the year and month** of the MSR you wish to view and/or print from the drop-down menus labeled “Year” and “Month.”
3. **Click “Run.”**
4. **INSTEP will refresh and display the selected MSR Monthly Exception Report in the bottom half of your screen.**
5. To print a hard (paper) copy of the report, scroll to the bottom of the screen and hover your mouse over the report. You should see the Adobe Acrobat toolbar appear.

6. Click on the printer icon to print the report.

7. To print another MSR Monthly Exception report, change the date fields (month and year) at the top of the MSR Monthly Exception Report screen, then click “Run.”

8. Follow steps 5 – 7 above to print additional reports.

Sending a Secure E-mail through INSTEP

INSTEP has a secure e-mail feature that allows INSTEP users to send and receive messages that contain protected health information (PHI) – or any detailed information about a specific child – safely and securely, without worrying about violating any HIPAA security or privacy rules.

To compose a secure message within INSTEP:

1. Start by accessing the Child Health Information Profile (CHIP) of the specific child about whom you are writing a message. You can access the CHIP by clicking on “Person Search” at the top of your INSTEP screen & completing the required fields (marked by a yellow triangle) or by clicking the “View the CHIP” link or button on your Exception Entry screen.

2. Click on the “Send an E-mail” button in the upper right corner of the CHIP.

---

Image: Child Health Information Profile

The profile shows collected data and activities performed for a person of interest.

<table>
<thead>
<tr>
<th>Child Information</th>
<th>Mother Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>PID: 5137137</td>
<td>PID: 5137136</td>
</tr>
<tr>
<td>Name: MURPHY DOG</td>
<td>Name: MOTHER DOG</td>
</tr>
<tr>
<td>Mother Maiden Name: DOG</td>
<td>Maiden Name:</td>
</tr>
<tr>
<td>Date of Birth: 1/1/0001</td>
<td>Date:</td>
</tr>
</tbody>
</table>

Actions:
- Close the case
- Send an Email
- Record a Fax
- Record a Phone Call

Click the “Send an Email” button to access INSTEP’s secure e-mail function.
3. INSTEP will display the Secure E-mail page.
   a. Select the name of the recipient by clicking on the “To” drop-down menu and picking the person’s name.
   b. Select the name of another recipient by clicking on the “CC” drop-down menu and picking the person’s name.
   c. Type the e-mail’s subject in the “Subject” line.
   d. Type your message in the “Body” text box. *Do not delete any text under the line marked “ISDH USE.”*
   e. If you wish to add any attachments to your message, use the “Upload a file” feature at the bottom of the screen. *See pages 32 – 34 of this User Guide for step-by-step instructions for uploading files.*
   f. When you are finished with your message, click “Send.”
4. INSTEP will send & store your e-mail message securely.
   a. Your actual message will stay within INSTEP—no PHI will be released outside of INSTEP.
   b. Instead of seeing your actual message (containing the PHI about the child) in his/her e-mail inbox, your recipient(s) will receive notification that a secure e-mail is awaiting them in INSTEP.
   c. The recipient(s) can click on the link in this message to log into INSTEP and access their “My E-mail” page to see your message.

**ISDH INSTEP Email Notice**

ceddy@isdh.in.gov

This message was sent with High importance.

Sent: Tue 8/15/2011 10:30 AM
To: Eddy, Courtney

Courtney Eddy has sent you a secured email.

To Access your message, simply follow these steps:

1. Click here to login and view the contents of this secured email.
2. Enter your user name and password when prompted.
3. Access your inbox to view the message.

If your email software does not support the ‘Click Here’ link above, copy the URL below and paste it into the address bar on your web browser:

https://gatewaydev.isdh.in.gov/GatewayTst/SignIn.aspx?appid=71&redirectTo=INSTEP.MyEmail.aspx
5. Your “My E-mail” page in INSTEP will display all e-mail messages you have sent or received through INSTEP.
   a. For details of an individual message, click the arrow to the left of the message.
   b. To reply to a message, click the “Reply” link.
   c. To delete a message in your Received or Sent e-mails, click the “X” icon. You will be asked for confirmation that you wish to delete the message.
   d. You can also sort your messages by clicking on any of the column headers within the My E-mail page (such as “From,” “Reply Date,” etc.).
Frequently Asked Questions (FAQs)

**Why can’t I log into the Gateway?**  
You must register for an account within the Gateway before you can log into the Gateway. In order to register for a Gateway account, make sure you’ve obtained the Gateway security code from Courtney Eddy. For more information about registering for a Gateway account, see pages 4 – 6 of this User Guide.

**Why don’t I see INSTEP as a tab on my Gateway home page?**  
You must request and be granted access to INSTEP before you will see an “INSTEP” tab on your Gateway home page. If you are a current Gateway user, you will need to request access to INSTEP through the Gateway home page. For more information, see pages 8 – 11 of this User Guide.

**How do I add a child to an MSR if I can’t find him/her by MRN?**  
If you search for a child by medical record number (MRN) and no matches are found within the INSTEP database, you will be automatically sent to the Exception Entry screen, where you will be able to enter demographic information for the child, his/her mother, and his/her primary care provider, as well as the exception information.

If you search for a child by MRN and cannot find the child in the list of potential matches that are found within the INSTEP database, click the “Child Not Listed” button to manually enter the child’s information.

For more information about entering demographic information within INSTEP, please see pages 18 – 21 of this User Guide.

**Why can’t I create a new MSR?**  
INSTEP will not allow you to open a new MSR if the previous month’s MSR has not been completed & submitted. INSTEP works like this so all “holdovers” are addressed appropriately the next month. See the next FAQ for more info on holdovers.

**How do I add an MSR if I only need to enter summary data?**  
Users who need to enter an MSR with no exceptions can click on “Summary Entry” in the Hospital MSR menu. On the Summary Entry screen, make sure that you have selected the correct month & year of MSR, then click the “Add New MSR” button. INSTEP will refresh & display your new MSR in the list of MSRs for the current calendar year. Enter summary data as usual.
Why are children from last month’s MSR automatically appearing on my MSR for this month?
These children are “holdovers” from the previous month. Certain exception codes (“Discharged without NBS,” “NICU,” “Initial Screen Next Month,” etc.) will require you to promote, or update, the child’s status on the next month’s MSR.
   Example: If a child was listed with the “NICU” exception code and received his/her NBS the following month, this child can be promoted / updated to “Finally Screened.” The child will not appear on the next MSR.

Should I enter time in 12-hour or 24-hour format?
Please enter times in INSTEP in a 24-hour (military) format (e.g., 11:15 PM = 2315). Be sure that you enter a “leading zero” for all times before 10 AM (e.g., 5:20 AM = 0520). Do not use a colon (e.g., 10:00 AM = 1000).

What if I don’t know the baby’s first name?
INSTEP contains a checkbox labeled “Child’s first name is unknown.” You should not enter a child’s first name as “Baby,” “Baby Boy/Girl,” or “Infant.” If you don’t know the infant’s first name, or if the infant does not yet have a first name, please check this box and leave the “First Name” text box blank.

How should I report a baby if his/her name has changed?
Report the child with his/her current legal name.
   • If the child’s previous last name is the same as the mother’s maiden name, report that name in the “Maiden Name” box.
   • Do NOT report a child’s name as “Smith (Jones)” or “Smith PREV Jones.” INSTEP will not be able to match this child’s record with his/her birth certificate & NBS lab results!
   • Remember that you can always update a child’s name in INSTEP until you close your MSR for the month. Once an MSR is closed, information can no longer be updated for that child’s record.

How should I assign birth order for twins, triplets, etc.?
Birth order should be matched to the assigned order from the babies’ birth facility. If a set of twins is transferred to your facility, infant B (2) at your facility should have been infant B (2) at the birth facility. Incorrect information can lead to duplicated or incorrectly merged records within the ISDH Repository.

What children should be reported as transfers in/out of my facility?
The new MSR form requires you to tell us about all children who enter or leave your hospital before having an initial newborn screen (NBS). You should report ALL of the following:
   • Transferred in to your facility: Every baby who was born at another facility, but comes to your facility without having an initial NBS
   • Transferred to another facility: Every baby who leaves your facility without having had an initial NBS

NOTE: You do NOT need to report children who are transferred in/out AFTER receiving a valid initial NBS.
How should I report a child who was transferred into my facility and received a valid initial NBS before I submitted my MSR?

- The transfer code for this child should be “Transferred into your facility.”
- The exception code for this child should be “Finally Screened.”
  - Do NOT enter this child with the “Transfer Only” exception code.
  - Be sure to include the date of NBS!

If a child was transferred in/out multiple times during the same month, how do I report that?
List the transfer code for whatever action happened LAST. For example, if a child was transferred out of your facility, back to your facility, and then out to another facility, that child would be reported on your MSR as “Transferred to another facility.”

What if a child was transferred to a hospital outside Indiana before having a valid initial NBS?
These children should be reported with the “Transfer Out” transfer code.

NOTE: You should be able to select the out-of-state organization’s name within the “Organization” drop-down menu for your transfer. If you can’t locate a facility in INSTEP, please contact Courtney Eddy with the hospital’s name and address so we can add it to INSTEP.

The exception code you use will depend on whether or not you have already received the date of NBS collection from the out-of-state hospital.

- If you have contacted the out-of-state hospital & confirmed that the child received his/her NBS, enter the child with the “Finally Screened” exception code & enter the date of NBS.
- If you do NOT have the date of NBS, enter the child with the “Transfer Only” exception code.

NOTE: Birthing facilities are responsible for contacting the out-of-state facility to obtain the child’s date of NBS & reporting this information within INSTEP!
How should I report NICU babies?

<table>
<thead>
<tr>
<th>What happened with this baby?</th>
<th>Your transfer code should be…</th>
<th>Your exception code should be…</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baby transferred to a NICU at another facility</td>
<td>Transferred to another facility</td>
<td>TRANSFER ONLY</td>
</tr>
<tr>
<td>Baby transferred to your hospital’s NICU, screened in same calendar month</td>
<td>Transferred to your facility</td>
<td>FINALLY SCREENED (provide NBS date)</td>
</tr>
<tr>
<td>Baby transferred to your hospital’s NICU, but did NOT receive NBS in same calendar month</td>
<td>Transferred to your facility</td>
<td>NICU (no date required)</td>
</tr>
<tr>
<td><strong>This child will be a holdover on next month’s MSR</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do I need to report babies born at the end of a calendar month as “Initial Screen Next Month” exceptions?
ONLY if that child has not received NBS by the time you submit your MSR. Children who are born at the end of a calendar month, but receive NBS at the correct time (e.g., on the 2\textsuperscript{nd}), are considered normal screens and don’t need to be reported.

How do I tally my exceptions each month?
ANY child that you report as an exception on your MSR counts as an exception, regardless of the transfer or exception codes. This includes any children who are “Transfer Only” exceptions or were promoted to “Finally Screened.” INSTEP will calculate your exceptions and total number of initial screens for you.

We realize that the number of initial screens reported in INSTEP may not match the number of initial screens recorded in your NBS log at your facility. This is okay! ISDH is no longer focusing on matching numbers—our follow-up is focused on ensuring that every child born in Indiana receives a valid and timely initial NBS.

Can I print my MSR?
Yes, you can! See the section “Printing Your MSR” within this User Guide for more information.

Is INSTEP compatible with Macintosh computers?
Currently, INSTEP is not fully compatible with Mac computers. Mac users may have reduced functionality of some components of INSTEP.

What types of files can I upload to INSTEP?
Currently, INSTEP will accept the following types of files: pdf, tiff, bmp, gif, png, doc, xls, docx, xlsx, xps, jpg, jpeg.
