1. Welcome and Injury Prevention Updates from IPAC Members
   • Christy Claborn, Franciscan Health Indianapolis: So far in 2016 we have had 370 car seat inspections between our Inspection Station and Project L.O.V.E. redemptions.
   • Michelle Moore, St. Vincent Anderson Regional Hospital: St. Vincent Anderson is currently working with St. Vincent Indianapolis to schedule Drive Now Text Later in some Madison County schools.

2. ISDH Updates
   1. New ISDH Injury Prevention Program Coordinator
      Preston Harness, MPH is the new Injury Prevention Program Coordinator. Preston holds a Bachelor of Science degree in Public Health and earned a Master’s degree in Public Health from East Tennessee State University with a concentration in Health Services Management and Policy. Before joining ISDH, he worked for a not for profit child advocacy center as well as the Veteran’s Health Administration.
   2. Child Passenger Safety
      Preston Harness will be focusing on child passenger safety in his new role and has completed the necessary course to become a certified child passenger safety technician. The ISDH has participated at several community events to share child passenger safety information, including at the 2016 Indiana Latino Expo and the Labor of Love Summit. The Booster Bash program will begin again next year once the weather is warmer.
   3. Local Health Department Naloxone Kits
      The Indiana State Department of Health distributed naloxone kits to local health departments in 20 Indiana counties to help prevent fatal opioid overdoses through a request for proposal. The purpose of the program is to expand the distribution across the state and increase education about the state law that provides immunity for lay responders to carry and administer naloxone. The 20 counties include: Boone, Clark, Clinton, Dearborn, Delaware, Fayette, Fountain/Warren, Franklin, Hendricks, Henry, Howard, Jackson, Jefferson, Madison, Marion, Monroe, Randolph, Ripley, Scott, and Washington. A
second round of the RFP will be released shortly and the information will be sent to health officers not funded during the first round.

4. Firework Injury Report
The annual firework injury report included 230 unduplicated cases, which is an increase from last year. This increase may be due to an increased awareness of the reporting requirement. As seen in previous years, a majority of the cases occurred in the first week of July. The fireworks report will be released soon and will be shared with IPAC in a bi-weekly email.

5. Child Safety COIN update
Dawn Smith, Trauma and Injury Prevention Associate, will be working on gathering resources and evidence-based programs related to the interpersonal violence COIN. We will hear a presentation on her progress at a future IPAC meeting.

The app has been downloaded 1,001 times and launched more than 3,408 times (as of 11/16/2016). Please be sure to use and share the app!

3. Pediatric Injury Prevention Presentation
   1. Infant mortality/ SUID Data
Kendra Ham, MPH, Infant Mortality Epidemiologist, from the ISDH Division of Maternal and Child Health provided background information on the overall burden of infant mortality in Indiana. Specifically, Kendra explained Sudden Unexpected Infant Death, also known as SUID contains three causes of death, including SIDS (Sudden Infant Death Syndrome), accidental suffocation/strangulation in bed, and unknown. In 2014, 597 infants in Indiana died before their first birthday, and black infants in Indiana are 2.5X more likely to die than white infants. Approximately 14.4% of infant deaths can be attributed to SUIDs. These outcomes are impacted by high percentage of women smoking during pregnancy and lower percentages of women receiving early prenatal care and breastfeeding when compared to the U.S.
   2. Safe Sleep Programming: Cribs for Kids and DOSE training
Fausta Houzanme, MPH, Safe Sleep Coordinator with the ISDH Child Fatality Review Division shared about the Indiana Safe Sleep Program. This collaboration between ISDH and the Department of Child services creates partnerships with community agencies to provide safe sleep education and Infant Survival Kits to target families and caregivers without safe places for infants to sleep. The Infant Survival Kits contain many items, including a Pack and Play and sleep sack and educational materials. Community partners can get involved by promoting safe sleep messaging, becoming or referring clients to crib distribution sites, promoting the DOSE program and the Cribs for Kids Hospital Certification.

Kelly Cunningham, MPH, Fatality Specialist with the ISDH Child Fatality Review Division
Sudden Unexplained Infant Death Investigation is the works to standardize and improve data collected at the death scene, promote consistent diagnosis of cause of death, enhance communication between team members, and learn from collective knowledge to prevent future infant deaths. Forensic autopsies start at the scene and SUIDI components include scene investigations, doll reenactment, and pre-autopsy report. DOSE is an innovative attempt at eliminating sleep-related infant death due to suffocation, strangulation or positional asphyxia by using First Responders to identify and remove hazards while delivering education on scene. DOSE is how First Responders can proactively reduce infant sleep-related death, and DOSE works in conjunction with a Safe Sleep Crib Distribution Program.

3. MCH MOMS helpline (1-844-MCH-MOMS)
Diana Feliciano, BSBM, MCH MOMS Helpline Manager from the ISDH Division of Maternal and Child Health presented on the newly rebranded MCH MOMS Helpline. The MCH MOMS Helpline mission is to reduce the infant mortality rate in Indiana by connecting families with access to available resources focused on improving the health of mothers and their children. The most common connections are
referrals for medical care, transportation, and dental care. The helpline also has certified Navigators available to help moms enroll in medical insurance. The MOMS helpline supports numerous ISDH MCH programs, as well as other ISDH divisions (including Trauma and Injury Prevention) and external community partnerships.

4. Vanderburgh County Pediatric Injury Prevention Activities & Report

Lynn A. Herr BSN, RN, CPN, CCRN, the FIMR, CFR and PHAB Coordinator from the Vanderburgh County Health Department (VCHD). The purpose of the Vanderburgh County Injury Prevention Report is to provide guidance to the VCHD, community partners, and the local SafeKids coalition on the development of injury prevention programs. The report includes four main sections, including use of local data, goals of injury prevention initiatives, current injury prevention programs, and plans for future reports. Lynn shared local data from trauma centers and the ISDH, and found that most injuries among children ages 0-13 years are due to falls and due to MVC for older children ages 14-18 years. The goal is to stimulate a coordinated effort to prevent injury, including the following activities:

– Raise awareness
– Draw attention to the preventability of child injury
– Define common set of goals, strategies and programs
– Join stakeholders
– Create recommendations for action by type of injury
– Provide recommendations for education, training and public policy
– Monitor the progress made in Vanderburgh and surrounding counties

Injury prevention activities include ATV safety, and a train the trainer program will be held January 17th-18th, 2017. Bike safety injury prevention activities include bike helmet fitting opportunities and partnering with the Evansville Bike Club. The VCHD is now a distributing cribs and safe sleep educational material, and local agencies have received the DOSE training. The VCHD conducts child passenger safety activities and provides car seat fitting training tuition to support local licensed day care providers. Lynn can be reached by phone: 812-435-5761 or email: lherr@vanderburghcounty.in.gov.

4. Potential Collaborations and Open Discussions

5. IPAC updates

1. 3rd annual IPAC conference planning

We are looking at hosting the third annual conference in May 2017. We will have a call for presenters and a call for abstracts for a poster session. The working title for the conference is: Making Connections: Community, Programs, and Progress. Please email Jessica (JSchultz@isdh.in.gov) if you know of any conflicts in May, have speaker and topic suggestions, or location ideas.

2. 2017 meeting dates: IPAC will meet from 10 a.m. – 12 p.m. EST.
   - March 17
   - May – Conference Date TBD
   - July 21 (webcast)
   - September 15
   - November 17

6. Upcoming Events and Activities in Injury Prevention

2. Teen Dating Violence Awareness Month – February 2017
3. Midwest Injury Prevention Alliance Summit – December 1 & 2
