

Key Features

- Complies with HIPAA standards
- Improve resource allocation
- Standard and ad hoc reporting capabilities
- Integrate with standard billing packages already in use

ImageTrend **State Bridge™** is a statewide pre-hospital patient care data collection, analysis and reporting system for EMS data management. State Bridge integrates information across the entire emergency medical community, giving access to accurate, useful data, and—in the end—helping to improve patient care.

Data Collection That Fits Your Needs

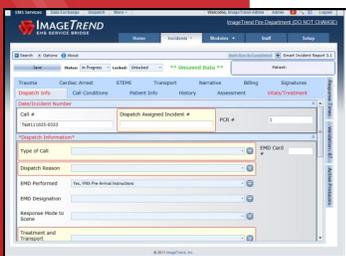

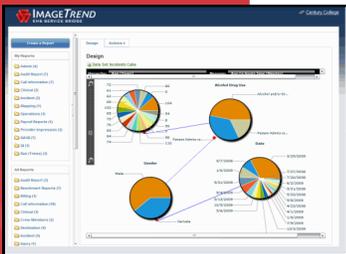

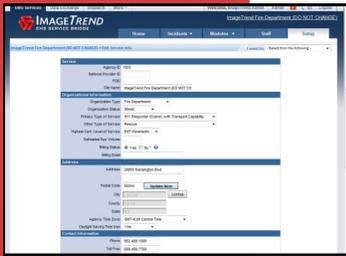

State Bridge, along with the rest of the EMS Bridge™ Suite, is bringing emergency patient care into the future, from rapid, touch or pen-based field data entry to in-depth analysis of collected data.

State Bridge offers:

- NEMSIS Gold data set
- More than 100 standard reports, as well as ad hoc reporting
- Online data entry or upgrade to one-click data submission from EMS Field Bridge™ or EMS Service Bridge™
- Integration with standard billing packages
- Complies with HIPAA standards
- Full support and education
- Scalable for unlimited services and users

Indiana State Department of Health

Save Time

- Quickly send ePCR's to hospitals
- Automate with CAD and Billing integration
- Access critical information on the fly

Save Money

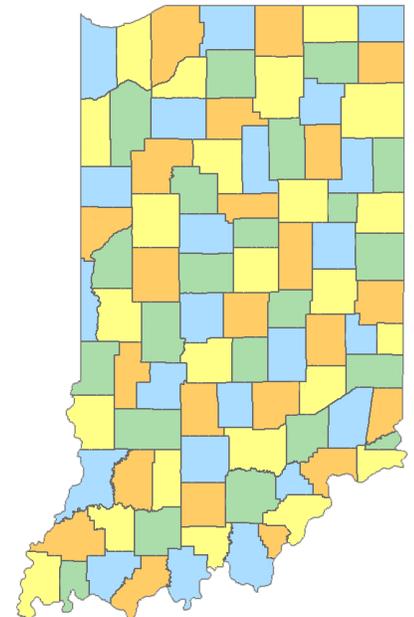

- Improve resource allocation
- Promote efficient growth
- Gain statistical evidence for funding

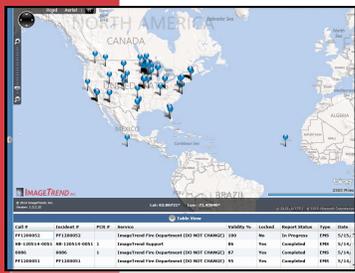

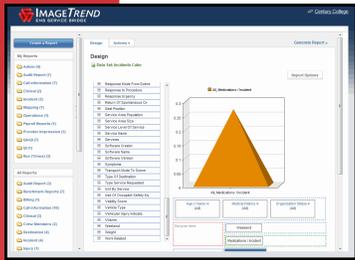

Save Lives

- Share patient care trends and outcomes
- Improve training guidelines based upon factual data
- Focus on patient care with faster data entry and automation

State-of-the-Art Data Collection

State Bridge provides a secure centralized data repository of all submitted EMS data for reporting, analysis and better understanding of patient care. Based on the NEMSIS Gold data set, you can be assured that this system is not only a standard, but state-of-the-art. Enter data through the online data entry page that looks just like a run form, import data via one of the standard data ports, or automatically upload data from EMS Field Bridge (optional), which allows for data collection in the field and one click submission.

Trusted Solutions for ePCR

- Complete ePCR from patient-side, pre-hospital data collection to service administration to statewide data collection and national reporting
- The ePCR solution chosen by more than half of the states in the U.S., as well as numerous local, county and regional services
- Proven for more than 45 million hosted incidents since 2001

Advanced Reporting

More than 100 standard reports, as well as ad hoc reporting, are available to support your efforts of not only gathering data, but turning that into useful information. Selectable criteria for **QA/QI reporting** gives administrators the flexibility to create custom reports based on established best practices, transforming data to new insights.

Visual Analysis

ImageTrend's optional **Mapping and Reporting System (MARS)** is an advanced visual analysis and reporting system that facilitates the exploration and understanding of databases, transforming data to provide visual based information.

Data Exchange

The Data Exchange supports XML standards for quick and easy data exchange among applications, ensuring streamlined communications and information continuity.

The EMS Bridge Suite Answers All Your Needs

Reporting to Indiana's State Bridge implementation will help with understanding of patient care and continued improvement across the health care continuum. With additional EMS Bridge solutions from ImageTrend, you can tap into more functionality and even greater reporting ease. Ask ImageTrend for more information on:

- Customizable run form layouts
- Service-defined questions
- Configurable validation rules
- Electronic ePCR submission to Hospitals
- Field-based documentation on ruggedized PCs, iPad® or Android® tablets
- Online shift and crew scheduling
- CAD integration
