Division grant activities

• National Violent Death Reporting System (NVDRS).
  – Awarded & funded for 3 years!
  – Coroners participating:
  – Law enforcement agencies participating:

• Overdose Data 2 Action (OD2A) Comprehensive Opioid Abuse Site-based Program (COAP)
  – Awarded & funded for 3 years!
    • Largest grant the division has ever applied for.
      – $7.1 million per year for 3 years
  – Planning a webinar in early September to share the specifics of the grant.
Evidence based falls prevention

**Stepping On**

**Population** – Older adults who want to reduce falls and increase confidence

**Sessions** – Seven 2 hour sessions and home visit. Booster session after 3 months

**Program** - home safety, fall risks, medication, etc. Exercises are emphasized.

**Group size** – 10 to 12

**Leader** – Health professional including guest lecturers.

**Materials** – Handouts, binder, information poster board, weights

**Cost** – Leader plus guest speakers, materials

**Outcomes** – Falls decreased by 31%

Wisconsin Institute of Healthy Aging. Originated in Australia
Upcoming classes

• Stepping On Leader training course

Stepping On
Leader Training Workshop
September 16th-18th 2019

Nasser Simulation Center at St. Vincent
11801 W. 86th Street
Indianapolis, IN 46260

Upcoming Booster Bashes

- Lake County:
  - Merrillville:
    - **Date:** June 26\(^{th}\) 2019
    - **Number of Seats Ordered:** 76
    - **Location:** Chateau Banquets, 530 W. 61\(^{st}\) Ave. Merrillville

- Vermillion County:
  - Clinton:
    - **Date:** August 2\(^{nd}\) 2019
    - **Number of Seats Ordered:** 60
    - **Location:** Sportland Park, Clinton
Indiana State Fair

Dates for division:
August 5, 9, 12, 13, and 14

Location: Indiana State Fairgrounds, Expo Hall
INSPECT STATEWIDE INTEGRATION ANNOUNCEMENT

Effective August 24, 2017 Indiana will begin steps to implement a statewide, comprehensive platform for healthcare professionals to review patients’ controlled-substance prescription history more quickly and efficiently. This platform supports Indiana’s Prescription Drug Monitoring Program (INSPECT) and transfers data into electronic health records (EHR) and pharmacy management systems. Statewide integration of the INSPECT platform is a key component of Indiana’s ongoing efforts to address the opioid crisis.

Integration Process:

1. Follow the instructions and complete ALL of the following (only authorized decision makers at the healthcare entity should fill out these forms):
   - Integration Request Form (located on the right of this page)
   - End User License Agreement (will be emailed to you within 24 hours)
   - PMP Gateway Licensee Questionnaire (will open in a new window)

Traumatic Brain Injury and Opioid Overdose: An Unrecognized Relationship

August 16, 2019
Trauma and Injury Prevention
Indiana State Department of Health

Lance E. Trexler, PhD, FACRM
Rehabilitation Hospital of Indiana
Indiana University School of Medicine
Summary

- Substance abuse is a risk factor for TBI.
- **51.5%** of people with TBI will have chronic pain.
- **70%** of people with TBI are prescribed an opioid.
- TBI results in neuropsychological impairments that affect self-regulation and self-management of drug taking behavior.
- Treatment with opioids also treats some of the consequences of TBI (e.g., mood).
- People with TBI are at significantly greater risk for opioid misuse and accidental overdose.
Biopsychosocial Evolution of TBI and Opioid Overdose

Pre-TBI Substance Abuse

- May be also be proceeded by childhood TBI

TBI

- Pain associated with TBI/other injuries and initiation of treatment with opioids

Cognitive, Behavioral and Mood disorders

- Opioids typically managed by someone not familiar with effects of TBI or associated risks

Opioid Use Disorder and Overdose
Substance Abuse as a Risk Factor for TBI

- **35-50%** of TBI’s were found to be use related.
- **71%** of TBI secondary to assault were use related.
- Alcohol use was **83%** and more than half used marijuana.
- Those with TBI consumed significantly more than national averages pre-injury, but after injury, use was consistent with national averages after one year but increased again by two years post-injury.
- Approximately **20%** who either abstained or were “light” drinkers pre-TBI showed high use post-injury.

Living with mild, moderate, severe brain injury

A Silent Epidemic

What you see

- Dizziness
- Imbalance
- Fatigue
- Headache
- Visual problems
- Difficulty processing
- Memory problems
- Can't concentrate
- Coordination issues
- Sleep disturbance
- Loss of motor skills
- Emotional lability
- Personality changes
- Sensitivity to noise
- Impulsivity
- Irritability
- Confusion
- Depression
- Spasticity
- Pain

What you don't see

The brain injury illusion.

#BrainInjury101  www.brainworksrehab.com
Neuropsychology of Opioid Misuse following TBI

- **Orbitofrontal:** Impulsivity, Reduced Judgement
- **Dorsolateral Frontal:** Impaired Initiation & Ability to Generate Problem-solving Strategies
- **Amygdala:** Irritability & Anger
- **Anxiety, PTSD & Depression**

**TBI**

**Frontal and Temporal Effects**

**Resulting Mood Disorders**

**Opioid Misuse and Overdose**
TBI and Types of Pain

Of TBI patients admitted to an acute rehabilitation unit:

- **40-50%** reported headache at 3, 6 and 12 months post-injury.
- **12%** developed complex regional pain syndrome.
- **11%** developed painful heterotopic ossification.
- **10%** were found to have peripheral neuropathic pain.
- **51.5%** of people with TBI will have chronic pain.

Narcotics Prescription During Inpatient TBI Rehabilitation – TBIMS Data

# received in sample 2103; % received among the other agents

- Oxycodone (864; 37%)
- acetaminophen (APAP) + hydrocodone (688; 30%)

New Resources:
Prescribing Recommendations for People with TBI (CDC +)

• Acute Setting:
  • TBI Pain Assessment in context of cognitive-communication impairments
  • Short-term use if necessary for tolerance of therapies with plan discontinuance
  • Opioids may increase acute TBI post-traumatic delirium – ongoing assessment

• Outpatient Setting:
  • Screen for lifetime exposure to TBI in the outpatient setting before prescribing
  • Consider extent of cognitive and behavioral impairment associated with TBI and effect on compliance
  • Risk stratification based on pre-injury SUD, affects of TBI, family situation, and pain
  • Family involvement
  • Monitor effects of opioids on cognitive and behavioral functioning
New Resources: TBI-Opioids Webinar

• Structure:
  • Digitally-recorded
  • Open access from web
  • 2 hours
  • Free CME’s

• Contents:
  • What is a TBI? - Flora Hammond, MD
  • Screening for Lifetime Exposure to TBI - John Corrigan, PhD
  • TBI as a Risk Factor for Opioid Misuse and Overdose. Lance Trexler, PhD
  • Recommendations for Prescribing Opioids for those with Lifetime History of TBI - Shashank Davè, MD

  • Where to find TBI Resources and Supports - Wendy Waldman, BSW
TBI and Opioid Toolkit (under construction)

• **Leadership:**
  - Lance Trexler, PhD, RHI/Indiana University
  - Jeremy Funk, MS, RHI (Project Manager)
  - John Corrigan, PhD, Ohio State University
  - Brandy Padilla-Jones, MD, Methodist Hospital/Indiana University

• **Advisory Committee**

Indiana SANE Training Project

Ashli Smiley, Statewide SANE Coordinator
Office of Women’s Health

Angela Morris, IN SANE Training Coordinator
SWI-AHEC

Email questions to: indianatrauma@isdh.in.gov
Ashli Smiley, BSN, RN

- Indiana State University: Bachelor of Science, Psychology and Criminology
- Lakeview College of Nursing: Bachelor of Science Nursing
- Ashli worked as an office manager and consultant for a legal team, a marketing coordinator within a financial institution and an education liaison in community outreach. Ashli has nine years of experience as a registered nurse, working primarily in acute care with medical psychiatric patients. In 2015, she completed her SANE training and began working as a forensic nurse in the emergency department of an Indianapolis level one trauma center. She has continued her work as a SANE at Hendricks Regional Hospital. Ashli has experience with providing excellent care and services for adult, adolescent and pediatric patients. She has used her experience for the benefit of training and precepting new forensic nurses, serving on committees for the betterment of services being provided to patients and providing witness testimony in court proceedings.

Angie Morris, BSN, RN, SANE-A, SANE-P, EMT-B

- Indiana University: Bachelor of Social and Behavioral Science
- Marian University: Bachelor of Science Nursing
- Angie worked for nearly 13 years in various roles within the criminal justice and legal field and served as a program director for the State of Indiana. Angie has experience as a forensic nurse examiner in the Emergency Department of a metropolitan level one trauma center, providing services to both adult and pediatric patients. Angie has served as a forensic nurse on hundreds of cases, provided expert and witness testimony in courtrooms, educated and precepted new forensic nurses and secured hundreds of thousands of dollars in grant awards to aid victims of sexual assault.
What is not working and how do we fix it?

• Rated among the highest in the nation for sexual assault
  • #2 for child abuse and neglect
• 54 out of 92 counties without any type of medical forensic services
• Low prosecution rate
• Lack of acute services is leading to chronic illness and revictimization
  • Poor outcomes
  • Long term economic health burdens on the community
  • Increased propensity to violence
• Increase availability of education and training for new and current SANEs
• Multidisciplinary collaboration
• Community engagement
• Breaking down the silos
  • TEAM WORK
How can you be apart of the solution?

• Train your nurses
  • Adult, Adolescent, and Pediatric
  • Continuing Education

• Build and expand your program
  • IPV, Sexual Assault, Child Abuse/Neglect, Elder Abuse, Physical Assault, Violent Crimes (stabbing, GSW, etc.)

• Get you and your nurses involved
  • SART teams
  • Committees
  • Professional Organizations

• Sustain your program
  • Peer Review
  • Administrative Engagement
  • Case Review
    • Address opportunities for improvement
  • Quality Patient Care
    • Evidence Based Practice Standards

• LET US HELP YOU!
  • Collaborate
  • Organize
  • Connect
  • Education and Clinical Support
  • Resources

  - Safety

EMS Compass

Improving Patient Care & Demonstrating Value to Your Community

Using Data to Make a Difference

The EMS Compass initiative is not simply about designing performance measures for the present. EMS Compass will create a process for the continual design, testing and evaluation of performance measures—and guidance for how local systems can use those measures to improve—so EMS can continue to provide the highest quality care to patients and communities in the future.
In April 2019, the NEMSQA Measure Development Committee approved the eleven measures included in the table below. These measures were reviewed and re-specified from their original release in the EMS Compass program.

- Treatment Administered for Hypoglycemia
- Pediatric Respiratory Assessment
- Administration of Beta Agonist for Pediatric Asthma
- Pediatric Weight Documented in Kilograms
- Seizure Patient Received Intervention
- Suspected Stroke Receiving Prehospital Stroke Assessment
- Pain Assessment of Injured Patients
- Effectiveness of Pain Management for Injured Patients
- Trauma Patients Transported to Trauma Center
- Use of Lights and Sirens During Response to Scene
- Use of Lights and Sirens During Transport

Meeting with IHIE leadership
Discussions are underway to integrate EMS data
Exploratory team looking at EMS data for a CCD
Integration would allow EMS data to be accessible from CareWeb
Funding may be an obstacle
More details to come in 2019
The Recognition of EMS Personnel Licensure Interstate CompAct (REPLICA) is the nation's first and only multi-state compact for the Emergency Medical Services profession.

REPLICA provides qualified EMS professionals licensed in a "Home State" a legal "Privilege To Practice" in "Remote States".

Home States are simply a state where an EMT or Paramedic is licensed;

Remote States are other states that have adopted the REPLICA legislation.
Benefits for EMS Personnel

- Obtain and maintain one EMS license, receive privileges to practice in REPLICA states while carrying out day-to-day duties, staffing large planned and unplanned events as authorized.

- Creates an expedited pathway to licensure for members of the military separating from active duty and their spouses with unrestricted NREMT card.

- Work under the scope of practice from your home REPLICA state.

- Reduced time, paperwork and costs associated with maintaining multiple licenses just to do your job.

Public Service

REPLICA enhances the way EMS is able to serve the public. REPLICA allows EMS personnel to better serve the public across state lines. (Note: REPLICA applies to individual EMS professionals, not EMS agencies.)
EMS Personnel Eligibility

• Must be 18 years of age and have met state licensure requirements at the EMT, AEMT or Paramedic level in a REPLICA Home State.

• Be practicing in good standing in their home state with an unrestricted license and under the supervision of an EMS Medical Director.

Veteran Recognition

REPLICA recognizes the service of veterans and their spouses. REPLICA provides a mechanism for our nation’s veterans to receive priority processing of EMS licensure paperwork.
State EMS Office – EMS System Eligibility

✓ Utilize the NREMT exam at the EMT and Paramedic levels for initial licensure

• Utilize FBI compliant background check with biometric data (e.g. fingerprints) within 5 years of Compact activation.

✓ Have a process to receive, investigate, and resolve complaints; and share information with other Compact states as necessary.

• Enact the model REPLICA legislation

Public Protection

REPLICA provides a mechanism for State EMS Offices to share licensure information, communicate, and coordinate.
REPLICA Next Steps

- Learning Lab took place on December 11th
  - National Governors Association
  - National Conference of State Legislatures
  - Council of State Governments
- Compacts discussed
  - REPLICA Nursing
  - Medical Licensing
- Education
- Consensus Building
- Legislation was introduced last session – withdrawn
- Meeting with IAFF leadership to further discuss any concerns
Replica Next Steps

• Compact now has 18 states.
• The Compact Commission adopted rules at their annual this year.
• The Commission now has a finance committee looking at the question of state assessments.
• The Commission isn’t expecting the NREMT to bankroll this project indefinitely. Too early to tell but I anticipate states being asked to pay a modest assessment of something like a few thousand dollars per year at some point in the future.
• There are no plans to assess fees to individual members.
Patient Safety Proposal

- Indiana EMS Statewide Assessment

• EMS Medical Directors

• Public Law No: 115-83 (11/17/2017)
Planning for DEA/CSR for EMS Providers

- This law amends the Controlled Substances Act.
- Specifies that EMS agencies are permitted to have one DEA registration, rather than having separate registrations for each EMS location.
- Ongoing discussions with the DEA
- Ongoing discussions with the Indiana Board of Pharmacy
- BOP rule must change for EMS Provider Agency CSR
- Commission needs to create/consider a rehabilitation policy for those EMS providers that have committed a drug diversion.
Stop the Bleed

The Indiana Department of Homeland Security is proud to be a supporting partner of the Stop the Bleed Program.

Stop the Bleed is a national campaign with two main goals:

- Inform and empower the general public to become trained on basic trauma care.
- Increase bystander access to bleeding control kits.
HB1063 SCHOOL SAFETY EQUIPMENT. (FRYE R) Adds definition of a "bleeding control kit". Provides that, subject to an appropriation by the general assembly, each school corporation and charter school shall develop and implement a Stop the Bleed program (program). Provides that the department of education in collaboration with the department of homeland security shall develop and provide training for the use of bleeding control kits. Provides that, in all matters relating to the program, school corporation or charter school personnel are immune from civil liability for any act done or omitted in the use of a bleeding control kit unless the action constitutes gross negligence or willful or wanton misconduct. Requires a school’s safety plan to include the location of bleeding control kits.

Stop the Bleed

Stop the Bleed is a national awareness campaign and call-to-action. Stop the Bleed is intended to cultivate grassroots efforts that encourage bystanders to become trained, equipped, and empowered to help in a bleeding emergency before professional help arrives.

SB 498

• Mobile Integrated Healthcare / Community Paramedicine
  • Authored by Sen. Karen Tallian
  • Gives the EMS Commission the authority to create the necessary rules/regulations concerning MIHP activities
  • Expands the definition of emergency medical services to include in home care, chronic care management and disease prevention
  • Requires FSSA to seek funding for reimbursement of activities
  • Establishes the MIHP grant fund to help support pilot programs across the state of IN
MIH-CP in Action

- MIH-CP currently offered in 33 states plus Washington, D.C.
  - 70% consider themselves CP
  - 30% consider themselves MIH
Biospatial

- National Collaborative for Bio-preparedness
  - NCBP provides operational and clinical insight to state and local data owners to help improve operations and patient outcomes.
  - NCBP provides alerts to anomalous health events, visualization of syndromic events and trends, and clinical and operational dashboards.
  - The collaborative data network widens the context of events by enabling sharing of data and syndromic trends with neighboring jurisdictions.
  - NCBP also enables new health- and safety-related insights through multi-agency collaboration, such as linking motor vehicle crash records with injury severity derived from the EMS Revised Trauma Score.
AED Registry

AED location information comes from the Atrus National AED Registry™.

Organizations with AEDs use this free online tool to comply with registration requirements, easily and efficiently manage AED location and maintenance information, and receive battery and electrode expiration reminders.

This registered AED data is available to 911 agencies that subscribe to the AED Link.

Certification and
Compliance Questions
IDHS/EMS Division 2018-2019 Goals

- Rewrite of the 836 IAC Articles 1 through 4
- Obtain 90% data reporting compliance of the Indiana certified ambulance service providers
- Develop a statewide quality improvement program for EMS utilizing patient data submitted to the EMS registry.
- In cooperation with the public safety training academy expand the executive leadership course to include EMS specific topics
- Develop the automated electronic interface between Acadis and National Registry database to facilitate a more efficient certification process.
- Develop rule language clarifying the EMS training institution’s responsibilities for improving student outcomes.
- Promote and encourage expanded practice opportunities for EMS providers with a focus on integrated health care, public health and chronic care management.
- Further develop education and training for both patient and EMS provider mental health awareness.
- Explore additional or alternative mechanisms of reimbursement for EMS provider care based on care rendered not miles transported.
- Promote recruitment and retention of EMS and other public safety professions.
- Continue the development of the online application process for EMS provider and institutional organization certifications.
- Implement the recognition of EMS personnel interstate licensure compact act (REPLICA).
- Continue to encourage and promote EMS planning and participation in disaster preparedness.
Thank you!

- Your input and participation in the Indiana EMS System is vitally important.

Email questions to: indianatrauma@isdh.in.gov
Quarter 1 2019

- 104 hospitals reported
  - 10 Level I and II trauma centers
  - 13 Level III trauma centers
  - 81 non-trauma centers

- 9,037 incidents

Email questions to: indianatrauma@isdh.in.gov
The majority of patients in the ED go to a floor bed.

Statewide categories <10% include: OR, home w/o services, observation, step-down, expired, and NK/NR/NA.

Email questions to: indianatrauma@isdh.in.gov
The majority of patients in the ED stay for **1-5 hours**.
Most patients in the ED >12 hours go to a **floor bed** or the **OR**.

- **Floor Bed**: 218
- **OR**: 57
- **Step-down**: 40
- **Transferred**: 26
- **Home w/o Services**: 13
- **ICU**: 24
- **Observation**: 13
- **Other**: 3

None of these patients died or had a disposition of AMA, Other, Home with Services or a Null value.

Email questions to: indianatrauma@isdh.in.gov
The majority of patients were at a level I or II trauma center.

- Level I and II: 248
- Level III: 101
- Non-Trauma Center: 38

Email questions to: indianatrauma@isdh.in.gov
The average patient age was 63 years.
Falls were the most common cause of injury.

- Fall: 281
- Transportation: 59
- Struck by/against: 17
The majority of patients are transported by *ambulance* or *private vehicle*.

- **Ambulance**: 296
- **Private**: 86
- **Other**: 4
- **Police**: 1

Email questions to: indianatrauma@isdh.in.gov
The majority of patients have an ISS score of 1-15.

**ED LOS > 12 Hours, N=387**

Interpretation: revised trauma scores (RTS) are based on the patient’s severity of injury. Higher categories indicate a lower chance of mortality. The majority of patients had a moderate RTS respiratory category, a moderate systolic blood pressure, and a high GCS motor score.
