### b) 2017 Goals

1. Increase the number of hospitals reporting to the Indiana trauma registry.
2. Decrease Average ED LOS
   i. Transfer Delay
      **Pilot Project**
3. Increasing Trauma Registry quiz participation.
4. Inter-facility transfer guideline.
5. Continued EMS run sheet collection.
1. Decrease average ED LOS at non-trauma centers
   i. Review of current average ED LOS
      Quarter 3 2016: 8 facilities responded (sent out letters to 59 facilities)
***************Definitions of critical categories***************

*Critical patient: had a GCS <= 12 or shock index > 0.9 or ISS > 15
*Physiological critical patient: GCS <= 12 or shock index > 0.9
*ISS critical patient: ISS > 15

- 28 facilities answered “Yes” to Transfer Delay

B) Transfer Delay Pilot
- Came about from the last two PI meetings of 2016
- 5 hospitals were identified and have agreed to participate (Community East, IU Health North, Methodist Southlake, St. Vincent Kokomo and Schneck Medical Center)
- Hospitals will be collecting Q1 2017 data through the pilot (facility questions), but continued collection through the typical transfer delay capture:

- Asking hospitals to take note of what works, what doesn’t, what’s missing, etc.

3. Increasing Trauma Registry participation
   a. Looked at all January-December 2016 quizzes
   b. 64 out of the 177 respondents took quiz at least 5 times
      i. Result: 36%
      ii. Fluctuation in numbers due to some factors.
4. Attachment (Indiana Sample Trauma Transfer Guideline)

5. **Reminder**: Increase EMS run sheet collection
   
i. Please send Katie list of EMS providers not leaving run sheets.
