Trauma Services Transfer Guidelines

TITLE: **TRAUMA TRANSFER PLAN**

PURPOSE: To identify those cases where consideration for rapid transfer to a Level I or Level II trauma center is needed to provide the critically ill patient the right resources in a timely manner.

GUIDELINES:

Transfers of the critically injured patient from Franciscan St. Elizabeth Health Lafayette, East to a Level I or Level II trauma center will be conducted with the mutual agreement between both the transferring and receiving facilities based on transfer agreements in order to provide rapid transfer of care.

- The decision to transfer a patient will be made solely on the patients' needs and not the ability to pay. EMTALA processes will be followed.
- Direct physician to physician contact will be made between the transferring and accepting facilities and at minimum will include: information about the patient injuries and current treatments.
- Every effort will be made to expedite the transfer of a critically injured patient within 2 hours of arrival. Transfer times and necessity will be monitored through the PIPS process.
- All attempts will be made to ensure patient is hemodynamically stable prior to transport. This may include operative interventions to control hemorrhage. Unstable patients may be transferred if benefit outweighs the risk after providing medical treatment within the capacity of the facility in order to minimize the risk to the patient. However, delay of transfer to definitive care in order to perform tests such as computed tomography scans when there is no surgical capability will be avoided.
- Copies of all available records including: imaging, labs, medication, transfer certificate and transfer consent will accompany the patient to the receiving facility.
- Appropriate means of transport is determined at the time of the direct physician to physician contact between the transferring and receiving facilities.
- Qualified personnel, equipment, and supplies should be made available during transport to meet the medical needs of the patient.

PROCEDURE:

A. Once there is a determination that the severely injured patient is in need of resources that FSEH Lafayette, East is not able to provide, the Emergency Care Physician and/or Trauma surgeon will initiate the transfer process. The following procedures may be used to determine the appropriateness of transfer:

1. Pediatrics
    a. Children age 15 or less with significant traumatic injuries
    b. Children with GCS less than 14 with head trauma
2. Burns
    a. All burn patients requiring specialized tertiary burn care
        i. Partial thickness and 3rd degree burns exceeding 20% of BSA

ii. Partial thickness and 3rd degree burns involving face, eyes, ears, hands, feet, genitalia, perineum, and major joints
iii. Full thickness burns greater than 10% of the BSA in any age group.
iv. Circumferential burns to extremities
v. Burns associated with significant fractures or other major injuries

3. Orthopedic
    a. Complex hand and foot fractures
    b. Complex pelvis/acetabulum fractures
    c. Multiple fractures of major long bones and joints and/or the spinal column associated with additional injuries
    d. Complex fractures with vascular compromise
4. Neurosurgical
    a. Complex craniofacial trauma
    b. Pediatrics with GCS less than 14 with head trauma
    c. Neurosurgical cases where Neurosurgeon in OR and back up not available
5. General Surgery/Vascular injury
    a. Limb threatening vascular injuries when no vascular surgeon coverage available
    b. Complex multi-system trauma at the discretion of the attending trauma surgeon
6. Cardiothoracic
    a. Thoracic aortic or great vessel injury
    b. Cardiac rupture
    c. Cardiothoracic trauma when there is no cardiothoracic coverage available

B. All trauma related transfers out of the facility will be monitored by the Trauma Services Performance Improvement and Patients Safety program (PIPS).
C. The Trauma Program Manager will collaborate with the receiving facility for appropriateness of transfer, case reviews, and educational opportunities.

**Transfer PI audit tracking tool will be used to identify appropriateness of transfer.

Transfer PI Audit

Reason for transfer: Circle one **ISS score:** _____ **MRN#** _____

1. Pediatrics
    a. Children age 15 or less with significant traumatic injuries
    b. Children with GCS less than 14 with head trauma
2. Burns
    a. All burn patients requiring specialized tertiary burn care
        i. Partial thickness and 3rd degree burns exceeding 20% of BSA
        ii. Partial thickness and 3rd degree burns involving face, eyes, ears, hands, feet, genitalia, perineum, and major joints
        iii. Full thickness burns greater than 10% of the BSA in any age group.
        iv. Circumferential burns to extremities
        v. Burns associated with significant fractures or other major injuries
3. Orthopedic
    a. Hand fractures
    b. Patella fractures
    c. Complex pelvis/acetabulum fractures
    d. Multiple fractures of major long bones and joints and/or the spinal column associated with additional injuries
    e. Complex fractures with vascular compromise
4. Neurosurgical
    a. Complex craniofacial trauma
    b. Pediatrics with GCS less than 14 with head trauma
    c. Neurosurgical cases where Neurosurgeon in OR and back up not available
5. General Surgery/Vascular injury
    a. Limb threatening vascular injuries when no vascular surgeon coverage available
    b. Complex multi-system trauma at the discretion of the attending trauma surgeon
6. Cardiothoracic
    a. Thoracic aortic or great vessel injury
    b. Cardiac rupture
    c. Cardiothoracic trauma when there is no cardiothoracic coverage available

Trauma Services Transfer Guidelines

TITLE: **TRAUMA TRANSFER PLAN**

PURPOSE: To identify those cases where consideration for rapid transfer to a Level I or Level II trauma center is needed to provide the critically ill patient the right resources in a timely manner.

GUIDELINES:

Transfers of the critically injured patient from Franciscan St. Elizabeth Health Lafayette, East to a Level I or Level II trauma center will be conducted with the mutual agreement between both the transferring and receiving facilities based on transfer agreements in order to provide rapid transfer of care.

- The decision to transfer a patient will be made solely on the patients' needs and not the ability to pay. EMTALA processes will be followed.
- Direct physician to physician contact will be made between the transferring and accepting facilities and at minimum will include: information about the patient injuries and current treatments.
- Every effort will be made to expedite the transfer of a critically injured patient within 2 hours of arrival. Transfer times and necessity will be monitored through the PIPS process.
- All attempts will be made to ensure patient is hemodynamically stable prior to transport. This may include operative interventions to control hemorrhage. Unstable patients may be transferred if benefit outweighs the risk after providing medical treatment within the capacity of the facility in order to minimize the risk to the patient. However, delay of transfer to definitive care in order to perform tests such as computed tomography scans when there is no surgical capability will be avoided.
- Copies of all available records including: imaging, labs, medication, transfer certificate and transfer consent will accompany the patient to the receiving facility.
- Appropriate means of transport is determined at the time of the direct physician to physician contact between the transferring and receiving facilities.
- Qualified personnel, equipment, and supplies should be made available during transport to meet the medical needs of the patient.

PROCEDURE:

A. Once there is a determination that the severely injured patient is in need of resources that FSEH Lafayette, East is not able to provide, the Emergency Care Physician and/or Trauma surgeon will initiate the transfer process. The following procedures may be used to determine the appropriateness of transfer:

1. Pediatrics
    a. Children age 15 or less with significant traumatic injuries
    b. Children with GCS less than 14 with head trauma
2. Burns
    a. All burn patients requiring specialized tertiary burn care
        i. Partial thickness and 3rd degree burns exceeding 20% of BSA

ii. Partial thickness and 3rd degree burns involving face, eyes, ears, hands, feet, genitalia, perineum, and major joints
iii. Full thickness burns greater than 10% of the BSA in any age group.
iv. Circumferential burns to extremities
v. Burns associated with significant fractures or other major injuries

3. Orthopedic
    a. Complex hand and foot fractures
    b. Complex pelvis/acetabulum fractures
    c. Multiple fractures of major long bones and joints and/or the spinal column associated with additional injuries
    d. Complex fractures with vascular compromise
4. Neurosurgical
    a. Complex craniofacial trauma
    b. Pediatrics with GCS less than 14 with head trauma
    c. Neurosurgical cases where Neurosurgeon in OR and back up not available
5. General Surgery/Vascular injury
    a. Limb threatening vascular injuries when no vascular surgeon coverage available
    b. Complex multi-system trauma at the discretion of the attending trauma surgeon
6. Cardiothoracic
    a. Thoracic aortic or great vessel injury
    b. Cardiac rupture
    c. Cardiothoracic trauma when there is no cardiothoracic coverage available

B. All trauma related transfers out of the facility will be monitored by the Trauma Services Performance Improvement and Patients Safety program (PIPS).
C. The Trauma Program Manager will collaborate with the receiving facility for appropriateness of transfer, case reviews, and educational opportunities.

**Transfer PI audit tracking tool will be used to identify appropriateness of transfer.

Trauma Services: Neuro Trauma Guidelines

TITLE: **Neuro Trauma Process Guide**

PURPOSE: To develop an organized and effective approach to the care and management of the injured neurosurgical trauma patient in order to improve outcomes.

GUIDELINES:

FSEH has Three Neurosurgeons who participate in Neurosurgical trauma call. FSEH keeps all adult neurosurgical traumatic injuries. Neurosurgical services take call for two facilities. In the event that the neurosurgeon is encumbered upon the arrival of a neurotrauma case, Trauma surgeons who are current in ATLS will provide initial evaluation and stabilization of the neurotrauma patient. All Trauma surgeons maintain current in ATLS as part of trauma panel credentialing.

PROCEDURE:

FSEH will follow the algorithm for neurosurgical traumatic patients for timely care:

FSEH Neuro Trauma Algorithm
