(a) The hospital shall have an effective, organized, hospital-wide, comprehensive quality assessment and improvement program in which all areas of the hospital participate. The program shall be ongoing and have a written plan of implementation that evaluates, but is not limited to, the following:

1. All services, including services furnished by a contractor.

Based on document review and interview, the hospital failed to include monitors and standards for 17 services provided by a contractor as part of its comprehensive quality assessment and performance improvement (QAPI) program.

Findings:

1. Review of the facility's QAPI program indicated it did not include monitors and standards for the contracted services as indicated in the MASTER SERVICES AGREEMENT between the facility and St. Vincent Hospital and Health Care Center, Inc., dated May 11, 2012:

   - Surgery, Anesthesiology, Recovery, Radiological Services (CT Scans, MRIs, Interventional Radiology, Ultrasounds,

The QA/PI Program has been updated to include the quality monitoring activities of these contracted services. Quality indicators (monitors) for these contracted services have been incorporated into the quality dashboards. The Manager of Organizational Excellence is the responsible party.

</tbody>
</table>

Based on documentation review, observation, and staff interview, the facility failed to ensure the Dietary Department was maintained in a clean and sanitary manner.

Findings included:

1. Contracted Dietary Service's Required Cleaning and Sanitization policy #F013 requires food-contact and non-food contact surfaces to be maintained clean and sanitary in the kitchen and the cafeteria. The chemical sanitizer used for food-contact surfaces was required.
to meet the manufacturer's recommendations.

2. At 10:00 AM on 3/12/2013, the kitchen was toured. The hand sink located in the kitchen next to the door entryway to the cafeteria was observed with a 55-gallon trash container with a lid on it. After staff washed their hands, the staff were observed opening the trash can's lid to discard the paper towels. This practice contaminated a person's hands after they have washed them by handling the soiled trash can lid. While touring the kitchen and the cafeteria, six wiping cloths were observed lying on prep counters surface table tops, deli cutting board and in a staff member's back pocket. The sanitizing wiping cloth rags were observed not stored in the OASIS 146 Quat solution between use of the cloths. During the tour of the kitchen and cafeteria on 3/12/13, three of three sanitizing wiping buckets that were used for food contact surfaces exceeded 500 ppm.

The Dietary Department uses OASIS 146 Quaternary Ammonia. The Ecolab's recommendation range requirement is 150 to 400 ppm concentration.

3. At 10:15 AM on 3/12/2013, a staff member was observed picking up a soiled rag off of the prep table in the kitchen and rinsing it out in the 3-compartment sink faucet's running water. After this step, the staff member wiped the same prep counter surface top and then laid the rag at the edge of the prep table. Then the staff member started to prepare another food item.

4. At 10:30 AM on 3/12/2013, the operational fan located on the floor next to the diet line's steam table was observed with heavy accumulation of dirt and other soil debris caked on the blade guards.

5. At 10:35 AM on 3/12/2013, the prep table located near the diet line was observed with a shelving rack above it which was storing spices on it.
and other miscellaneous food items. The shelf was observed sticky to touch and also had visual evidence of food spill on it.

6. At 11:15 AM on 3/12/2013, the outside Walk-in Freezer was observed with heavy ice build-up on the floor covering approximately a 2-foot by 3-foot area on the floor; the ice build-up was approximately 6-inches thick. Accumulation of ice was also observed hanging from the condenser.

7. At 12:00 PM on 3/12/2013, the exterior surfaces of the wood doors to the cabinets located behind the cafeteria serving line were observed with food smeared on them and were sticky to touch. The inside surfaces of the cabinets had evidence of several liquid spills. The inside surfaces were also sticky to touch and there was accumulation of dust and other loose food debris in them. Two cabinet doors located behind the

2. During the tour of the kitchen and cafeteria at 10:00 AM on 3/12/2013, one of the kitchen staff members was observed wiping their gloved hands on their apron and not changing gloves and washing hands afterwards. Another kitchen staff member working behind the cafeteria serving line was observed at least 3 times changing gloves without washing his/her hands before putting on a new set of single-use gloves. A third staff member was observed wiping their prep table down with a sanitizer rag and did not wash their hands before putting on their single-use gloves. A fourth kitchen staff member was observed handling dirty vegetables during washing them and not washing their hands before putting

food or clean utensils/dishes/equipment; Before putting on gloves; After touching hair, skin, beard or clothing; After handling garbage; After removing gloves; After handling rags and mops; ...

2013. Recording temperatures daily and labeling of food (name, date, expiration) training completed on March 26, 2013. Proof of associate training and competency will be maintained in the associate files. Touchpoint Leadership required to be on-site at Seton at least 4 times a week to ensure program success and adherence to policies and procedures. Touchpoint Leadership presence on-site at Seton began immediately (during survey) and has continued. These on-site visits will be a complimentary combination of short stops, inspections, team building and long day sessions at Seton to ensure staff are effective and efficient in their roles. Touchpoint leadership has implemented monthly quality inspections. Copies of these monthly inspections and action items implemented as a result of the inspections are provided to Seton. A quality indicator in regards to the monthly inspections have been added to the dashboard for quality reporting to the Board of Directors. The Safety Officer/Facilities Manager is the responsible party.

2. Philips Healthcare North America invoice noted the piece of healthcare equipment installed the CX50 Ultrasound System between 5/11/2012 through 5/14/2012.

3. At 9:30 AM on 3/13/2013, staff member L8 indicated the CX50 Ultrasound System was on his/her Preventive Maintenance Schedule to be performed every 6 months.

4. At 11:00 AM on 3/13/13, staff member L7 indicated Philips Warranty agreement requires the CX50 Ultrasound system to have a PM annually. The staff member confirmed the healthcare equipment was scheduled to be PM every 6 months; however, when a piece of equipment will be scheduled for preventive maintenance, the computer system will print a work order for the required PM. Staff member L7 investigated into the
location of the PM that should of been done in November 2012. At 1:00 PM on 3/13/13, staff member L7 indicated the piece of equipment was scheduled annually; however, at 10:57 AM on 3/13/2012 the CX50 Ultrasound system was changed in the computer to be completed in a 6 month cycle which was more stringent. Staff member L7 confirmed the record that was provided confirmed the piece of equipment should have had PM during the month of November 2012. Therefore, the CX50 Ultrasound system was 4 months late on its required preventive maintenance.
### SUMMARY STATEMENT OF DEFICIENCIES

- **410 IAC 15-1.5-8 PHYSICAL PLANT**
  - **410 IAC 150-1.5-8 (d)(3)**

  (d) The equipment requirements are as follows:

  (3) Defibrillators shall be discharged at least in accordance with manufacturers recommendations and a discharge log with initialed entries shall be maintained.

  Based on document review and interview, the hospital failed to properly keep a discharge log for 1 of 1 defibrillators in accordance with manufacturers recommendations.

**Findings:**

1. Review of the Zoll M Defibrillator manual indicated the Operator's Shift Checklist for M Series Products was recommended for checks and procedures to be performed at the start of each shift. The Checklist included, but was not limited to:
   - Paddles - paddles clean, not pitted, release from housing easily
   - Inspect cables for cracks, broken wires, connector - ECG electrode cable, connector, defibrillator paddle cables, multi-function cables, connector
   - Batteries - fully charged battery in unit, fully charged spare battery available

**X5) COMPLETION DATE**

04/05/2013

- The code cart log sheet has been updated to include the manufacturers recommendations for the Zoll M Defibrillator. A copy of the manufacturers recommendations has been laminated and placed on the code carts for reference. Staff education completed the week of March 31-April 6, 2013. The Site-Administrator/CNO is the responsible party.
2. Review of a hospital policy entitled Code Cart maintenance - Indianapolis, last revised 01/2012, indicated no reference to the manual, Operator's Shift Check List, nor any other indication which included the Operator's Shift Check List items.

3. Review of a document entitled Code Cart Integrity Sheet, Date: March, 2013, Code Cart Location: Pharmacy, indicated it did not include the above-stated checks.

4. In interview, on 3-12-13 at 4:25 pm, employee #A3 confirmed the above and no further documentation was provided prior to exit.

Based on document review and interview, the hospital failed to have written documentation of a regular state or local fire inspection in 1 instance.

Findings:

1. Review of documents indicated there was no documentation or request for same in calendar 2012 of a regular state or local fire inspection.

2. In interview, employee #A8 confirmed the above and no further documentation was provided prior to exit.

The Safety Officer had completed a request via phone call for 2012 but had nothing in writing. This was corrected during survey as the Safety Officer submitted an e-mail request for a fire inspection for 2013. Fire inspection completed by the Local Jurisdiction having Authority (LJA), Pike Township Fire Department, on April 16, 2013, with no findings. The Safety Officer/Facilities Manager is the responsible party.
