5.2.1 Access Order Service Date Intervals

(T)

Access Service is provided with one of the following Service Date Intervals:

(C)

- Standard Interval
- Negotiated Interval

To the extent the access service can be made available with reasonable effort, the Telephone Company will provide the access service in accordance with the customer's requested interval, subject to the following conditions:

(A) Standard Interval

The Telephone Company shall publish and make available to all customers a schedule of standard intervals applicable for Switched and Special Access Services. The schedule specifies the services and quantities that can be provided within the published interval. Individual copies of the Telephone Company schedule of Standard Intervals will be made available to customers upon request.

Access service will be installed during the Telephone Company's business day. If a customer requests that installation be done outside of normally scheduled working hours, and the Telephone Company agrees to this request, the customer will be subject to applicable Additional Labor Charges as set forth in 13.2 following.

- (1) There is no Standard Interval for the service;
- (2) The quantity of Access Services ordered exceeds the quantities specified in the standard intervals; or
- (3) The customer requests a service date beyond the applicable Standard Interval service date.

The Telephone Company will offer a service date based on the type and quantity of Access Services the customer has requested. The Negotiated Interval may not exceed by more than six months the Standard Interval Service date, or, when there is no Standard Interval, the Telephone Company offered service date.

Each service is subject to a service inquiry. A service inquiry is a request to the Telephone Company to determine if facilities exist to provide the service ordered and to determine the service date on which service can be provided to the customer.

All services for which rates are applied on an individual case basis are provided with the Negotiated Interval.

The Telephone Company maintains exclusive right to accept or deny the request to expedite the access service orders. If, upon reviewing availability of equipment and scheduled work load, the Telephone Company agrees to provide service on an expedited basis and the customer accepts this proposal, an expedited order charge will apply.

The request for an earlier service date may be received from the customer prior to the issuance of an access order, or after the access order has been issued but prior to the service date.

If the Telephone Company is subsequently unable to meet an agreed upon expedited service date, no Expedited Order Charge will apply unless the missed service date was caused by the customer.
