

TRAVIS MURPHY

Travis Murphy is Business Development Manager over renewable energy for Johnson Melloh Solutions where his focus is developing large commercial, institutional, industrial, and even some utility-scale solar projects around the Midwest and beyond. He has spent the better part of the last year finalizing such deals with the City of Indianapolis, the Indiana Department of Transportation, and the highly anticipated Indianapolis International Airport Solar Farm. Prior to his current stint with JMS, Travis spent nearly three years as Manager of Renewable Energy Development for the Indiana Office of Energy Development (OED). There he was charged with integrating prospective renewable energy development firms with the economic, regulatory, and business environment of Indiana, all on behalf of the Lt. Governor's Office.
