METHOD OF CORRECTION:

Full Failure:

Claims setting this audit will suspend.

The Reso Analyst will review related history and perform the following actions:

- If there is **no history** for the claim, a system error window box 6007 will populate and audit will need to be force overridden, as there is no history.
- If related history **does** show and it is the same tooth number, deny the line item and post EOB 6224.
- If related history **does** show and it is not the same tooth number, force override the detail to pay.

Cutback:

Claims setting this audit will systematically cutback to the approved number of units allowed not to exceed once per lifetime.
