IHCP updates age restriction for ICD-10-CM diagnosis code O03.30

The Indiana Health Coverage Programs (IHCP) is updating the International Classification of Diseases, Tenth Revision (ICD-10) Clinical Modification (CM) diagnosis code O03.30 – *Unspecified complication following incomplete spontaneous abortion* to change the age restriction to members ages 9 to 64, to align with guidelines published by the Centers for Medicare & Medicaid Services (CMS).

In 2015, the IHCP implemented age restrictions in the Core Medicaid Management Information System (*CoreMMIS*) claim-processing system for reimbursement of claims submitted for members ages 12 to 55. Effective for dates of service (DOS) on or after Nov. 1, 2024, the age restriction for code O03.30 is being updated.
