

July 30, 2007  
Indiana Wind Energy Task Force  
Policy Work Group

Notes

What are our (Policy Work Group) goals?  
Should Indiana have a Renewable Portfolio Standard?  
Regarding technology - does push (mandate) work better than pull (incentives)?  
What incentives (pull) would work?

Tax incentives?  
Production tax credit?

Is there a need for statewide uniformity regarding incentives?  
Would wind turbine installation/sites in Indiana be essential to having a manufacturing plant in Indiana?  
Who are the stakeholders? - Prioritize  
Should there be an enhancement of Indiana's "net metering"?  
Should incentives benefit both "big" and "small" wind?  
Should the state focus on wind turbine technology and manufacturing?  
IEDC should assess the intention of the state to pursue the development of manufacturing facilities. How much should Indiana invest?  
What kind of policy should Indiana have to promote wind energy?
