However, a suspension may not be imposed if the sole basis for the suspension is the practitioner's inability to pay a fine.

administration of light parenteral conscious sedation carries with it significant risks that mandate basic minimum requirements for patient protection.

(b) The following are the minimum standards of care when light parenteral conscious sedation is utilized:

(1) An appropriate medical history form must be completed and dated for each patient.
(2) The medical history form must be reviewed by the dentist, and all significant responses must be evaluated and noted on the form.
(3) If medical consultation or additional laboratory testing is indicated, it must be obtained prior to initiation of treatment except in an extreme emergency situation.
(4) Physical evaluation and pretreatment vital signs must be taken and recorded on the patient's chart.
(5) In addition to the dentist who has obtained training in resuscitation protocols, there must be present during administration of light parenteral conscious sedation at least one (1) additional person who has successfully completed a course in basic cardiac life support.
(6) Personnel trained in basic cardiac life support shall provide direct supervision and monitoring of the patient during the procedure and until the patient is deemed ready to leave the facility by the dentist.
(7) The patient shall be monitored by the pulse oximeter throughout the procedure.
(8) A blood pressure must be taken periodically throughout the procedure.
(9) The skin color, movement of breathing bag, blood color, or other parameters of adequate blood oxygenation shall be monitored throughout the procedure.
(10) At or before the time of discharge, printed postoperative instructions must be provided to the patient and a responsible adult who will accompany the patient. Vital signs must be stable and the patient must be appropriately responsive before leaving the dentist's office. The patient must be instructed not to operate any vehicle or other potentially hazardous device or engage in a potentially hazardous activity for an appropriate period of time.
(11) It is strongly recommended that the dentist and trained staff hold drills on emergency procedures four (4) times per year. A record that the drills have taken place should be maintained in the office of the dentist. The record should include the date that the drill took place and the names of those persons who participated in the drill. The records may be destroyed after three (3) years.
(12) The dentist shall maintain a record that the dentist has training in resuscitation protocols and that the dentist's staff has maintained, on an annual basis, current training in basic cardiac life support.
(13) The equipment used during the procedure must be in good working order and serviced and certified as necessary.

(2) Covered individuals who are health care workers shall, either individually or through their employer, upon receipt of a written request by the department, employer, or a patient to whom direct services have been provided, provide evidence of compliance with the requirements of this section.

Authority: IC 16-41-11-9
Affected: IC 16-41-11

Sec. 8. (a) All covered individuals and health care workers under this rule shall comply with the requirements imposed under the Indiana occupational safety and health administration's bloodborne pathogens standards (as found in 29 CFR 1910.1030).

(b) The operator and all covered individuals whose professional, employment, training, or volunteer activities or duties are performed at or on behalf of a facility providing services to patients or other members of the public in which there is a reasonably anticipated risk of skin, eye, mucous membrane, or parenteral contact with human blood or other potentially infectious materials shall also comply with the following requirements:

(1) All equipment and environmental and working surfaces shall be cleaned and decontaminated after contact with blood or other potentially infectious materials.

(2) Heating procedures capable of sterilization must be used when heat stable, nondisposable equipment is sterilized. Monitoring of heat sterilization procedures shall include documentation of the following:
(A) Each sterilization cycle.
(B) Use of chemical indicators when sterilizing packaged nondisposable equipment.
(C) That biological indicators were used within thirty (30) days prior to the current sterilization procedure.
(D) Routine equipment maintenance according to manufacturer recommendations.

Documents required under this subdivision must be made available to the department upon request.

(3) Reusable equipment requiring sterilization that is destroyed or altered by heat must be sterilized by chemical means.

(4) Environmental surfaces and equipment not requiring sterilization which have been contaminated by blood or other potentially infectious materials shall be cleaned with an absorbent material prior to disinfection. Disinfectant solutions shall:
(A) Be a germicide registered with the Environmental Protection Agency (EPA) for use as a hospital disinfectant and labeled tuberculocidal or registered germicide with specific inactivation claims against HIV and HBV; or
(B) Be a sodium hypochlorite solution dated and not used after twenty-four (24) hours old as follows:
(i) A minimum of 1:100 dilution (one-quarter (¼) cup of five and twenty-five hundredths percent (5.25%) common household bleach in one (1) gallon of water).
(ii) A 1:10 dilution (one (1) part five and twenty-five hundredths percent (5.25%) common household bleach in nine (9) parts water) shall be used when a blood, culture, or OPIM spill occurs in the laboratory setting.

(5) If a patient's diagnosis, laboratory analysis, or medical condition requires additional infection control measures or isolation, those specific measures apply in addition to the requirements of this rule and other requirements found at IC 16-19.
Sec. 8.1. (a) An HIV infected or HBV infected (and HBeAg positive) health care worker whose practices include digital palpation of a needle tip in a body cavity or the simultaneous presence of the health care worker's finger and needle or other sharp instrument in a poorly visualized or highly confined human anatomic site should either seek the advice of an ERP approved by the department or voluntarily cease these practices.

(b) As used in this rule, "expert review panel" means a group of experts authorized under this rule to provide confidential consultation and advice to HIV and HBV (and HBeAg) infected health care workers as indicated to promote the highest achievable level of safe, professional care. To be deemed authorized, an ERP must be sponsored by an organization which has been approved by the department under subsection (c).

(c) Before any public or private medical, surgical, dental, nursing, or other health care organization may sponsor an authorized ERP under this section, the potential sponsor must be approved by the department as having provided credible assurances that:

1. the sponsor is capable of establishing specific ERP protocols and procedures that will accomplish the purposes of an ERP under this section; and
2. it will comply with general protocols to be established and disseminated on request by the department.

(d) The ERP will consist of:

1. an expert review entity consisting of:
   (A) the HIV or HBV infected health care worker's treating physician, either directly or through medical and historical treatment records;
   (B) an infectious disease specialist knowledgeable in the epidemiology of HIV and HBV infection;
   (C) a health care provider of the same profession as the infected health care provider with expertise in the procedures practiced; and
   (D) an infection control expert or epidemiologist; or
2. any other expert review entity expressly authorized by the department.

(e) An ERP sponsored by an organization approved by the department under subsection (c) will be deemed an authorized ERP.

(f) An ERP shall advise the health care worker whether and how to modify techniques or to cease performing certain procedures. In rendering this advice, the ERP shall consider the past history of the health care worker's technique, and the extent to which, in the context of other indicated procedures with a measurable and unavoidable significant risk to patients, an indicated invasive procedure in the hands of that health care worker does or does not expose patients to the significant risk of HIV or HBV transmission from the health care worker.

(g) The role of the ERP is strictly confidential and advisory to the health care worker.

(h) All proceedings and communications of the ERP shall be confidential. All communications to an ERP shall be privileged communications. Neither the personnel nor any participant in a panel proceeding shall reveal the identity of any health care worker consulting such panel nor any content of communication to the records of or the outcomes of an ERP outside the panel to any person or other entity, other than the health care worker consulting such panel.

(i) No person who participates in an ERP proceeding shall be permitted or required to disclose any information acquired in connection with, or in the course of, the proceeding, any opinion, recommendation, or evaluation of the panel or of any panel member.

(j) The only duty of an ERP is to provide good faith consultation and advice to the HIV or HBV infected health care worker seeking such advice. A health care worker is not, by this rule, relieved of any responsibility, either to himself or herself or to others, for all actions taken or not taken in his or her professional capacity after consulting with an ERP. Neither an ERP nor any member of an ERP is approved by this rule to substitute or assume responsibility for the subsequent actions of the health care worker. No civil or other legal action of any nature shall arise against any member or personnel of an ERP for any good faith act or statement made in the confines of the panel or proceeding thereof.

(k) Neither an ERP nor any member of an ERP shall, by virtue of their consultation and advice, assume any liability of any kind to the health care worker, his or her patients, or any other person. The personnel and members of an ERP shall be immune from any civil action arising from any determination or recommendation made in good faith in the scope of their duties.
