The creation of maps and geo-referenced data bases representing authoritative locations for boundaries, fixed works, or topography, either by terrestrial surveying methods or by photogrammetric or GNSS locations. This includes maps and geo-referenced data bases prepared by any person, firm, or government agency if that data is provided to the public as a survey product.

The following items are not included as activities within the definition of the practice of surveying:

(1) The creation of general maps:
(A) prepared by private firms or government agencies for use as guides to motorists, boaters, aviators, or pedestrians;

(3) The transcription of public record data, without modification except for graphical purposes, into geographic information systems-based cadastres, including tax maps, zoning maps, and associated records by manual or electronic means, and the maintenance of that cadastre, if the data are clearly not intended to authoritatively represent property boundaries.

The distribution of these maps and data bases outside the organization must contain appropriate metadata describing, at a minimum, the accuracy, method of compilation, data source or sources, and date or dates, and disclaimers of use clearly indicating that the data are not intended to be used as a survey product.

(7) Maps, cross-sections, graphics, and data bases depicting the distribution of natural resources or phenomena prepared by foresters, geologists, soil scientists, geophysicists, biologists, archeologists, historians, or other persons qualified to document and interpret the data in the context of their respective practices.

Sec. 4. (a) The licensing agency shall employ necessary staff, including specialists and professionals, to carry out the administrative duties and functions of the boards, including but not limited to:
(1) notice of board meetings and other communication services;
(2) record keeping of board meetings, proceedings, and actions;
(3) record keeping of all persons or individuals licensed, regulated, or certified by a board;

(b) In addition, the licensing agency:
   (1) shall prepare a consolidated statement of the budget requests of all the boards in section 3 of this chapter;
   (2) may coordinate licensing or certification renewal cycles, examination schedules, or other routine activities to efficiently
        utilize licensing agency staff, facilities, and transportation resources, and to improve accessibility of board functions to the public;
        and
   (3) may consolidate, where feasible, office space, record keeping, and data processing services.

(c) In administering the renewal of licenses or certificates under this chapter, the licensing agency shall issue a sixty (60) day
    notice of expiration to all holders of a license or certificate. The notice must inform the holder of a license or certificate of the
    requirements to:
        (1) renew the license or certificate; and
        (2) pay the renewal fee.

(d) If the licensing agency fails to send notice of expiration under subsection (c), the holder of the license or certificate is not
    subject to a sanction for failure to renew if the holder renewes the license or certificate not more than forty-five (45) days after the
    holder receives the notice from the licensing agency.

(e) The licensing agency may require an applicant for a license or certificate renewal to submit evidence showing that the
    applicant:
        (1) meets the minimum requirements for licensure or certification; and
        (2) is not in violation of:
           (A) the law regulating the applicant's profession; or
           (B) rules adopted by the board regulating the applicant's profession.

(f) The licensing agency may delay renewing a license or certificate for not more than ninety (90) days after the renewal date
    to permit the board to investigate information received by the licensing agency that the applicant for renewal may have
    committed an act for which the applicant may be disciplined. If the licensing agency delays renewing a license or certificate, the
    licensing agency shall notify the applicant that the applicant is being investigated. Except as provided in subsection (g), the board
    shall do one (1) of the following before the expiration of the ninety (90) day period:
        (1) Deny renewal of the license or certificate following a personal appearance by the applicant before the board.

        (3) Renew the license and file a complaint under IC 25-1-7.
        (4) Request the office of the attorney general to conduct an investigation under subsection (h) if, following a personal

            described in IC 25-1-11-5.

(5) Upon agreement of the applicant and the board and following a personal appearance by the applicant before the board,
    renew the license or certificate and place the applicant on probation status under IC 25-1-11-12.

(g) If an applicant fails to appear before the board under subsection (f), the board may take action as provided in subsection
    (f)(1), (f)(2), or (f)(3).

(h) If the board makes a request under subsection (f)(4), the office of the attorney general shall conduct an investigation. Upon
    completion of the investigation, the office of the attorney general may file a petition alleging that the applicant has engaged in
    activity described in IC 25-1-11-5. If the office of the attorney general files a petition, the board shall set the matter for a public
    hearing. If, after a public hearing, the board finds the applicant violated IC 25-1-11-5, the board may impose sanctions under
    IC 25-1-11-12. The board may delay renewing a license or certificate beyond ninety (90) days after the renewal date until a final
    determination is made by the board. The applicant's license or certificate remains valid until the final determination of the board is
    rendered unless the renewal is:
        (1) denied; or
        (2) summarily suspended under IC 25-1-11-13.

(i) The license or certificate of the applicant for license renewal remains valid during the ninety (90) day period unless the
    license or certificate is denied following a personal appearance by the applicant before the board before the end of the ninety (90) day
    period. If the ninety (90) day period expires without action by the board, the license or certificate shall be automatically renewed
    at the end of the ninety (90) day period.

(j) Notwithstanding any other law, the licensing agency may stagger license or certificate renewal cycles.

(k) An application for a license or certificate is abandoned without an action by the board if the applicant does not complete the
    requirements for obtaining the license or certificate not more than one (1) year after the date on which the application was filed.
    However, the board may, for good cause shown, extend the validity of the application for additional thirty (30) day periods. An
application submitted after the abandonment of an application is considered a new application.

Sec. 8. (a) As used in this section, "board" has the meaning set forth in section 6(a) of this chapter.

(b) The licensing agency may delay reinstating a license, certificate, or registration for not more than ninety (90) days after the date the applicant applies for reinstatement of a license, certificate, or registration to permit the board to investigate information received by the licensing agency that the applicant for reinstatement may have committed an act for which the applicant may be disciplined. If the licensing agency delays reinstating a license, certificate, or registration, the licensing agency shall notify the applicant that the applicant is being investigated. Except as provided in subsection (c), the board shall do one (1) of the following before the expiration of the ninety (90) day period:

If the practitioner fails to pay the civil penalty within the time specified by the board, the board may suspend the practitioner's license without additional proceedings. However, a suspension may not be imposed if the sole basis for the suspension is the practitioner's inability to pay a civil penalty.

(c) The board may withdraw or modify the probation under subsection (a)(5) if the board finds after a hearing that the deficiency that required disciplinary action has been remedied or that changed circumstances warrant a modification of the order.

The summary suspension may be renewed after a hearing before the board. Each renewal of a summary suspension may be for not more than ninety (90) days.

(c) Before the board may summarily suspend a license under this section, the consumer protection division of the office of the attorney general shall make a reasonable attempt to notify a practitioner of:

and bounds description is not required for individual, platted subdivision lots.
(3) North arrow, area, and scale, including a graphic scale.
(4) Angles or bearings. When bearings are shown, their basis shall be indicated.
(5) All pertinent dimensions. On dimensions other than those measured, sufficient notations shall be used to identify their
source, such as the following:
(A) Recorded measurement (Rec).
(B) Calculated from record values (Calc. Rec.).
(6) All pertinent monuments, with a notation indicating which were found and which were set, including those required to be
set by section 18 of this rule, identified as to:
(A) their character;
(B) their size;
(C) their location including their location relative to the surface of the ground; and
(D) whether or not they were held as control on the survey.
Found monuments shall be accompanied by a reference to their origin when it is known. Where there is no available
documented origin, it shall be so noted on the plat.
(7) The location of all monuments and physical evidence of possession on or beyond the surveyed premises on which
establishment of the corners of the surveyed premises are dependent. This includes monuments on all controlling corners or
lines appropriate to the description of the tract being surveyed, but in no case shall the survey show fewer than two (2)
monumented corners regardless of the description of the tract. The Indiana state plane coordinate system may be used as the
basis for a survey in accordance with IC 32-19; however, such use does not relieve the registered professional surveyor of
applying
proper theory of location.
(8) Any physical evidence of possession appurtenant to either the surveyed premises or the adjoining property that is on, near,
or across any exterior boundary of the premises. Show the location of such evidence by the distance to such boundary. Show
any setback or easement line on the premises that may have been a factor in the location of a boundary line. Failure to show
any such evidence will be taken to indicate that there was none.
(9) Any:
(A) lakes;
(B) streams;
(C) known regulated drains; or
(D) regulated drain rights-of-way;
on or within seventy-five (75) feet of the surveyed premises. A detailed location, based on applicable statutes and rules, is
required when a boundary or easement is determined thereby.
(10) Any evidence of use of the surveyed premises by others.
(11) Adjoining parcels identified by title description or record reference. Contiguity, gaps, and overlaps with adjoining parcels
shall be clearly shown and dimensioned. Show only the portion of adjoining tracts relevant to the location of the surveyed tract.
Gaps and overlaps interior to the surveyed parcel shall be depicted but must be dimensioned only if the client requests.
(12) Any easements or setback lines affecting the survey that were created by a subdivision plat.
(13) Any other easements or setback lines affecting the survey, as required and when documentation is furnished by the
client.
(14) If requested by the client, show zoning ordinance classification references. Any zoning use certifications shall be limited
to those facts that can be counted or measured.
(15) The following:
(A) Sufficient data to clearly indicate the theory of location applied in finalizing the locations of the corners.
(B) Any data at variance with this theory of location.
(C) Sufficient data to allow the retracement without difficulty of all pertinent lines and corners shown on the plat.
Detail that cannot be legibly depicted on the survey plat shall be otherwise explained in the surveyor's report.
(16) A certificate stating that the survey was performed wholly or in part (state which part) by or under the direction of the
registered professional surveyor, and to the best of the registered professional surveyor's knowledge and belief was executed
according to survey requirements in this rule. This certificate shall bear the:
(A) signature;
(B) registration number; and
of the registered professional surveyor and date of the certificate.

(17) If necessary to define the location, a vicinity map shall be provided.

(c) Notwithstanding the requirements of this rule, except for section 18 of this rule, any new subdivision plat may show only the information required by the applicable subdivision control ordinance or other regulation.

(d) Any new subdivision plat recorded must be cross-referenced to a previously recorded survey, which conforms to this rule, of the tract that contains it.

(e) The certificate for a new subdivision must state that there has been no change from the matters of survey revealed by the cross-referenced survey, or any prior subdivision plats contained therein, on any lines that are common with the new subdivision. A new survey, which conforms to this rule, must be executed and recorded if there have been changes in matters of survey from those revealed by the prior recorded survey or any subdivision plats therein on any lines common with a new subdivision. Sec. 14. When conducting an original survey, a professional surveyor shall do the following:

(1) Obtain or prepare the documents establishing the intended position of the lines to be created by the original survey, such as any of the following:

(A) The client's sketch.

(B) Instructions defining the lines.

(C) A tentative subdivision map.

(2) Obtain copies of the laws regulating division of property that govern in the jurisdiction in which the property is located.

(3) Survey that portion of the parent tract required to define the lines of the parcel being created by the original survey. This work must be in accordance with this rule. Any conflicts or gaps between the lines of the retracement survey and the adjoiners' lines that affect newly created tracts must be clearly depicted on the original survey, showing which of the new tracts are affected and to what extent.

(4) Conduct field surveys to determine the location of planimetric or topographic features, if any, that are to control the intended position of the lines being created.

(5) In the case of new subdivisions or original surveys, the registered professional surveyor shall inform the client of any conflicts between the following:

(A) The requested position of the lot lines to be created.

(B) The position required by any applicable ordinances or regulations.

These conflicts must be resolved before certifying the survey or, if they are not, the conflicts shall be noted on the face of the plat or in the surveyor's report. 865 IAC 1-12-18 Original and retracement survey monumentation
Authority: IC 25-21.5-2-14
Sec. 18. (a) When conducting a retracement survey or an original survey, a registered professional surveyor shall be responsible to set monuments in accordance with this section.

(b) Except as provided in subsection (h) a monument, as defined in subsections (c) through (g), shall be set at every lot or parcel corner being surveyed, including the interior lots of a subdivision. Corners to be set include the beginning and end of curves and the intersection of lines except where the setting of a monument near another monument would cause confusion. Further, a monument is not required to be set if there is an existing monument at the corner that is within the limits of the relative positional accuracy for the class of survey being performed.

(c) Monuments set in unpaved or other nonimpervious locations shall be five-eighths (e) inch diameter or larger iron or steel rods, reinforcement bars, or galvanized pipes weighing a minimum of one (1) pound per foot and being at least twenty-four (24) inches long and set with not less than eighteen (18) inches below grade. Other monuments may be used if they:

1. are made of material of similar or greater durability, size, and character; and
2. can be found by a device capable of detecting ferrous or magnetic objects.

(d) Where practical, monuments in pavement or other impervious areas shall be set according to the requirements contained in subsection (c). However, when it is not practical to set a monument in accordance with subsection (c), then a two (2) inch or longer, one-fourth (¼) inch or larger diameter, magnetic concrete nail, or similar magnetic monument shall be set, if possible.

(e) Monuments set under subsection (c) or (d) shall have a substantial plastic or metal tag or cap permanently affixed showing the registered professional surveyor’s surname and professional license number or board-issued firm/agency identification number.

(f) Where monuments as defined in subsection (c) or (d) cannot be set, the survey points must be:

1. marked by:
   A. a drill hole;
   B. a cut cross;
   C. a notch; or
   D. other similar permanent mark; and
2. referenced to any nearby witness monuments or permanent objects, such as:
   A. building foundations; or
   B. concrete head walls.

(g) Monuments required by local ordinances shall be set provided they meet or exceed the requirements in subsections (c) and (d).

(h) Where it is not possible or practical to set a monument at the survey point:

1. a monument shall be offset; and
2. the location shall be selected so that the monument lies on a:
   A. line of the survey; or
   B. prolongation of the line.

However, offset monuments are not required at interior lot corners not adjoining a street right-of-way. Offset monuments shall be identified as such on the plat and, if possible, in the field. However, if existing monuments fall within the acceptable relative positional accuracy of the survey, a monument will not be required to be set.

(i) If recovery of the monument would be difficult due to the topography or other features of the land, the monuments shall be witnessed or referenced in such a manner that will facilitate their recovery.

(j) At the time they are set, monuments shall be marked, such as with ribbon, paint, or lath, to facilitate the recovery of the monument by the client.

(k) It shall be the responsibility of the professional surveyor certifying the subdivision plat to set all monuments required by this section in a new subdivision.

(l) Monuments shall be set before providing the client with the survey documents required by this rule. However, in the case of new subdivisions where, in the opinion of the surveyor, it is probable the individual lot monuments will be disturbed by construction, only the perimeter of the subdivision, or section thereof, must be monumented before recordation. In this situation, the setting of the individual lot monuments may be delayed until no later than:

1. after construction is complete (including buildings); or
2. two (2) years after recordation of the subdivision plat or, if the subdivision is platted by sections, after recordation of each section; whichever occurs first. In new subdivisions, if monuments are to be set before recording, then the placement of monuments shall be shown on the subdivision plat. If monuments are to be set after construction is complete, the surveyor shall record an affidavit, cross-referenced to the recorded plat, showing which monuments were set and which were found, the dates the monuments were set or found, together with a certification that states to the best of the surveyor's knowledge and belief the information contained in the affidavit is true and correct. Nothing in this subsection shall be construed to require the surveyor to wait until construction is completed to place monuments.

80
(m) A surveyor is not required to replace or restore any monument that the surveyor has set that has been:
(1) moved;
(2) disturbed; or
(3) destroyed;
after its original placement for the current survey.

(n) Identification numbers, other than registered professional surveyor's registration numbers, used by a land surveying firm or government agency under subsection (c) or (d) must be assigned and authorized for use by the board. Request for firm or agency numbers must be in writing on forms provided by the board. (State Board of Registration for Professional Surveyors; 865 IAC 1-12-18; filed Jun 21, 1988, 4:05 p.m.: 11 IR 3914; filed Jul 17, 1991, 4:30 p.m.: 14 IR 2248; filed Oct 13, 1992, 5:00 p.m.: 16 IR 891; readopted filed May 22, 2001, 9:55 a.m.: 24 IR 3237; filed Jan 26, 2004, 11:00 a.m.: 27 IR 1888; filed May 4, 2006, 1:25 p.m.: 29 IR 3014; readopted filed Nov 9, 2012, 11:26 a.m.: 20121205-IR-865120390RFA) NOTE: 864 IAC 1.1-13-19 was renumbered by Legislative Services Agency as 865 IAC 1-12-18.

Affected: IC 25-21.5
Sec. 21. When conducting a route survey, a professional surveyor shall do the following:
(1) Establish the location of the control survey points upon which all subsequent work will be based so that they can be retraced and are recoverable by other surveyors without difficulty during and after construction.
(2) Determine the location of the following:
(A) Any lines or corners, or both, necessary to describe any acquisition parcels.
(B) Any United States Public Land Survey subdivision corners that are available from the county surveyor or reasonably accessible and relevant to the route survey or acquisition parcels, or both.
(3) Set any final monuments required by section 24 of this rule, and those required by the client.
(4) Take sufficient check measurements to satisfactorily verify the work.
(5) Keep survey field notes showing all pertinent information, measurements, and observations made in the field during the course of a survey in a manner that is clear to other professional surveyors who may use the information so recorded.
(6) Make necessary computations to substantiate correctness of field measurements. Affected: IC 25-21.5
Sec. 22. (a) When conducting a route survey, the professional surveyor shall be responsible to use the minimum standards of measurement for urban surveys provided for in section 7 of this rule, except that relative positional accuracy may not exceed five tenths (0.5) feet for a route survey.
(b) Measurements generally shall be shown on the route survey plat with a number of significant figures representative of the precision of the work.

         (ii) Occupation or possession lines.
   (2) Record the route survey plat and any subsequent revisions as defined in section 25 of this rule, together with the associated surveyor's report defined in this subsection, in the files of the county recorder's office in the county where the property is located on or before the date of acquisition of any tracts relative to the plat.
(b) An accurate description for all parcels to be acquired shall be furnished to the client. Descriptions may be by metes and bounds but, in any case, shall be controlled by a call for all that part of the owner's land that lies within the total acquisition tract. The acquisition tract or tracts shall be depicted on, or described by reference to:

(B) notation that there is no available documented reference of the origin.

(4) Locate all monuments using an accepted practice such as:
(A) Indiana state plane coordinates;

(B) The separate plats are all recorded.
(C) Any plats related to the route survey that are subsequently recorded are cross-referenced to any previously recorded plats related to the same route survey.
(D) The work is conducted in accordance with the requirements of section 3 of this rule.

Authority: IC 25-21.5-2-14
Affected: IC 25-21.5

Sec. 27. (a) Surveyor location reports are designed for use by a title insurance company with loan policies on small tracts containing a one (1) to four (4) family house even if now used for commercial purposes. A surveyor location report shall not be used for nonresidential tracts greater than two (2) acres.
(b) A registered professional surveyor does not assume responsibility regarding the location or existence of any underground use except that indicated by readily visible surface evidence. The client shall be responsible for providing any title documents other than recorded plats that are required for the report.

Sec. 28. When conducting a surveyor location report, a registered professional surveyor shall do the following:
(1) Briefly describe and show the location of visible evidence of possession. Show the location of this evidence by the shortest dimension to:
(A) the nearest adjacent boundary line; or

(A) Driveways.
(B) Parking lots.
(C) Personal property, such as aboveground swimming pools or yard barns. With respect to any railroad on or adjoining the property, note if the tracks have been removed. If that is the case, note any visible evidence of construction, trenching, or other use observed on or along the railroad.
(4) Show the location and recording data for any easements or setback lines on the tract as determined from:
(A) recorded documents provided by the client; or
(B) a recorded plat.
(5) Show the location of the perimeter of any visible evidence of cemeteries found on the surveyed tract.
(6) Show the approximate size, location, and brief description of any lakes, ditches, or streams on the tract or any known regulated drains on or within seventy-five (75) feet of the property. Detailed locations are required when:
(A) a boundary is determined thereby; or
(B) buildings or other improvements are located within a legal drain easement.
(7) Show the name and location of any road, street, alley, or other public way abutting or on the surveyed property with the:
(A) width of the traveled way;

865 IAC 1-12-30 Section corner perpetuation
Authority: IC 25-21.5-2-14
Affected: IC 25-21.5; IC 36-2-12

Sec. 30. (a) This section outlines the procedures and requirements for registered professional surveyors when perpetuating the location of original public land survey or grant corners. As used in this section, "grant" means a subdivision, parcel, or tract of land that existed, or the parent tract of which existed, prior to the commencement of the United States Public Land Survey adjoining such subdivision, parcel, or tract.

(b) The purported location of an original public land survey or grant corner as referenced by the county surveyor of the county in which the corner exists is prima facie evidence of that corner's location. The registered professional surveyor's responsibility with regard to the use of or need for original public land survey corners or grant corners in association with an original or retracement survey is not met by merely contacting the county surveyor.

(c) If the:
(1) location of an original public land survey or grant corner is not monumented and referenced by the county surveyor in accordance with Indiana Code 36-2-12; or
(2) registered professional surveyor discovers evidence, or otherwise has reason to believe, that a monument purporting to mark the location of an original public land survey or grant corner is not in the proper location; and if that corner is necessary for purposes of conducting an original, retracement, or route survey as defined in this rule, the registered professional surveyor shall contact the county surveyor and perpetuate that corner's location in accordance with this section if the county surveyor is unable to perpetuate the corner in the time frame required by the registered professional surveyor.

(d) A registered professional surveyor shall perpetuate the location of an original public land survey or grant corner by gathering evidence that may assist in determining the original location of that corner. This evidence includes, but is not limited to, the following:
(1) Copies of:
(A) The original public land survey field notes and plat or transcribed copies of same.
(B) Deeds and plats that reference the location of the corner.
(C) Historic survey records, road, street, highway, and bridge plans, corner records, recorded surveys and other relevant information from the county surveyor, county recorder or other county, state and municipal offices.
(D) Current or historic aerial photographs.
(E) Records from private surveyors who practice or used to practice in the vicinity of the corner.
(2) Parol evidence from knowledgeable landowners or others who may have information relating to the corner.
(3) The field location of:
(A) Fences.
(B) Walls.
(C) Roadways.
(D) Survey markers.
(E) Tree lines.
(F) Other lines of possession.
(G) Interrelated or nearby section corners, quarter section corners, quarter-quarter corners, or other aliquot corner of a section, and corners of common report.
(e) After evaluating and weighing the evidence outlined in subsection (d), the registered professional surveyor shall do the following:
(1) Apply appropriate theory of location to determine the probable locations of the corner.
(2) Excavate or otherwise determine if there is a subsurface monument in those locations unless, in the registered professional surveyor's opinion, there is no substantial possibility of:
(A) a corner stone; or
(B) other historical survey monument;
being found in those locations. Examples of such situations include, but are not limited to, corner locations that fall in concrete highways, in areas where other excavations have previously taken place, such as, for culverts or sewers, or in areas of substantial cut or fill, such as, for interstate highway overpasses or underpasses.

Before excavating, the registered professional surveyor shall notify the appropriate jurisdictional agencies.

(f) If, as a result of the corner investigation:
(1) a corner stone;
(2) historical survey monument; or
(3) other evidence;
is found marking the corner, the registered professional surveyor shall remonument and reference the corner if necessary to facilitate its recovery by other surveyors.

(g) If, after excavating or otherwise conducting subsurface investigations of the probable locations outlined in subsection (e), a corner stone, historical survey monument, or other evidence of the corner is not found, the registered professional surveyor shall do the following:

(1) Establish the location of the corner:
(A) based on the best available evidence; and
(B) in accordance with procedures for lost or obliterated corners outlined in or authorized by the United States Code in 43 U.S.C. 751, 43 U.S.C. 752, and 43 U.S.C. 753, which are hereby incorporated by reference.

(2) Monument that location.

(h) If the corner was perpetuated for use on an original, retracement, or route survey, the registered professional surveyor shall do the following:

(1) Describe and reference the monument in such a manner that facilitates its recovery by other surveyors.

(2) Document the following:
(A) The chain of history of the corner to the best of his or her knowledge.
(B) The evidence found and weighed.
(C) The search area or areas.
(D) The theory of location applied in re-establishing the corner.
(E) Other relevant information regarding the perpetuation of the corner in the surveyor’s report or on the plat of survey, or both.

(3) Provide a copy of the surveyor’s report and plat of survey to the county surveyor.
