Formative Assessment Grant History

The charts below show the history of participation and per unit funding distributions. Student participation showed a slight decrease for the 2019-2020 school year.

The Formative Assessment Grant was first distributed to schools in School Year 2015-2016. For School Year 2015-16, the grant was administered with different parameters than all subsequent years as distributions were made first to Grades 3-10 with a second and separate round for Grades K-2. As these data points are not comparable, they are not included within the charts above.
