INDIANA ELECTIONS DIVISION
2014 JAN 13 AM 10:15

Dear Sirs:

I would like to deliver to you on behalf of the Wabash County Election Board our Vote Center Plan for Wabash County. We are in the process of implementing our Plan starting with the May 2014 election.

We will, of course, modify the Plan in the future as changes in the law occur, and when necessary to better serve the voters of Wabash County.

Please let us know if you have any questions.

Respectfully submitted,

Elaine J. Martin, Clerk
Wabash Circuit/Superior Court

INTRODUCTION

What is a Vote Center?

A vote center is a place where any registered voter in the county can vote on Election Day. Vote centers bring to bear new technologies to revolutionize the voting process. Instead of traditional precinct-based polling sites on Election Day, the vote center concept calls for vote center locations where any registered voter from any precinct can go to retrieve their correct ballot style and cast their ballot. Every precinct ballot style is available at every vote center location. In addition, because of electronic poll books, when a voter signs in at one vote center, every other vote center's electronic poll book is automatically updated to reflect that voter as having cast their ballot.

Why Wabash County?

Since 2007, Indiana has been experimenting with the vote center concept through a pilot program launched by the Indiana Secretary of State's office and the Indiana General Assembly. In 2011, the Indiana General Assembly passed legislation to allow any Indiana county to pursue becoming a vote center county. Since 2011, government and civic leaders in Wabash County have been observing vote centers' impact on voters and election administration. The pilot programs showed that vote centers streamlined election administration and improved voter convenience. In addition, vote center counties have seen a cost reduction in their elections over time.

Because of these results from the pilot programs in Indiana (which can be found at www.VoteCenters.IN.gov), leaders in Wabash County decided to pursue this exciting new approach to election administration for the 2014 Election Cycle.

What is required to become a Vote Center County?

Indiana Code 3-11-18.1-3 sets forth the requirements for a county to become a vote center county. The first step to becoming a vote center county requires a draft vote center plan which details specifics of how such a transition would occur. This document serves as the vote center plan for Wabash County. Indiana Code 3-11-18.1-4 sets forth the requirements of a county's vote center plan. Once a draft plan is submitted for public review and comment at a public meeting of the County Election Board, the opportunity for the public to review the draft plan and submit comments must remain open for 30 days. After 30 days of opportunity for the public to review and comment on the draft plan, the County Election Board holds another public meeting to consider all public comments and then votes to adopt the vote center plan as is or as amended. In order for the county to become a vote center county, the County Election Board must by unanimous vote approve a vote center plan, and the County Commissioners and County Council must approve by majority vote resolutions approving the status of the county as a vote center county.

If all three of those things occur, the plan must be filed with the Indiana Election Division and Wabash County will officially become a vote center county. Any future amendments to the plan or a decision to return to traditional precinct-based elections must be voted on by unanimous vote of the County Election Board and filed with the Indiana Election Division.

OVERVIEW OF THE PROCESS

The Vote Center Task Force

Once a vote center plan is adopted by the County Election Board and filed with the Indiana Election Division, the County Election Board, the County Election Staff, and the Indiana Team from Election Systems and Software (Collectively known as "the Vote Center Task Force") will move forward with preparing for this major change in Election Administration for the 2014 Election Cycle.

The Task Force is made up of people with tremendous experience in the election process. The County Election Board has a track record of working in a bipartisan way to ensure the process is free and fair. The County Election Staff works hard year round preparing Wabash County for elections. The ES&S Indiana Team brings to the table experienced managers who both understand Indiana law, the vote center concept, and have an intimate knowledge of electronic poll books.

The Voting Equipment

Wabash County will continue to use the Microvote Infinity machines, which are DRE (Direct Recording Electronic) machines fully certified under Indiana law. These machines will allow any voter to go to any vote center and retrieve the correct ballot style electronically.

Electronic Poll Book

Wabash County has selected an e-poll book system that will be securely connected to every vote center and to the County Election Board in the Wabash County Clerk's Office located in the Wabash County Judicial Center on Election Day. It will securely connect every satellite vote center. The ES&S ExpressPoll-5000 meets all standards set out by Indiana law under IC 3-11-8-10.3. The ES&S Indiana Team has intimate knowledge and experience with electronic poll books.

E-Poll Book Description and Security Details

The ExpressPoll-5000 Electronic Poll Book hardware and software is designed to function as a secure voter validation system. The ExpressPoll-5000 uses a dedicated hardware enclosure which provides a strong, secure enclosure for the unit.

The ExpressPoll-5000 enclosure stores voter validation data using redundant solid state, non-volatile compact flash memory with "no moving parts." Solid state compact flash memory is used in place of a fragile hard disk drive, as the electronic poll books will receive the same rough handling as tabulation equipment. Hard disk drives, with moving parts, are prone to hard drive crashes when they receive rough handling. Electronic poll books must function properly to keep voter lines moving on Election Day, and the ExpressPoll-5000 ensures this.

When a poll worker turns on the Expresspoll-5000, the system will cycle to a screen containing one icon, labeled "Launch ExpressPoll." The poll worker simply touches this icon to boot-up the ExpressPoll software. This simplifies poll worker training, as a series of icons that are unrelated to the system's primary function, voter validation, are not accessible to the poll worker. During Election Day, a poll worker using the ExpressPoll system cannot open other programs on the unit, as it is a dedicated

electronic poll book. ***If a standard laptop or notebook PC is used to support the electronic poll book software, a collage of icons can appear on the initial screen when boot-up occurs, confusing a poll worker and possibly enabling them to enter other software applications on the PC which could provide a security risk.*** In addition, the electronic poll books cannot be accessed without the coordinated action of two (2) precinct election officers who are not members of the same political party. The precinct election officers will be provided passwords.

When a voter arrives at the vote center, his/her eligibility will be brought up on an ExpressPoll-5000 screen. In a primary election, the clerk will indicate which party ballot the voter has requested (Republican or Democrat). The system will record the time that the voter was checked in and the records will be updated back to a central database located in the Wabash County Clerk's Office/Voter Registration office or on a server provided by ES&S. The updated record will be available instantly to the County Election Board and the electronic poll books used by precinct election officers at all other vote centers in Wabash County. If a voter attempts to vote again, the database will show him/her to be ineligible.

The dedicated ExpressPoll-5000 enclosure is not susceptible to theft, unlike an off-the-shelf notebook computer which can be enticing to a thief.

The removable compact flash memory card is physically stored in an enclosed compartment on the top of the ExpressPoll unit. The door covering the compact flash memory card compartment can be secured using a security tag with an audit number which will expose any attempt to physically tamper with the memory card.

Data stored in the ExpressPoll-5000 redundant compact flash memory can be encrypted using sophisticated RC-4 data encryption. In addition, Wabash County can deploy VPN routers on WAN to provide native data encryption to transmissions.

The use of an election official's or poll worker's user ID and password provides access to accomplish designated tasks within the system. Every log-on attempt generates an audit log event, so it is very easy to read the audit log and determine what activities were completed by a specific person. The ExpressPoll-5000 units are issued by device ID number in carrying cases, which can be sealed with a numbered seal.

Each ExpressPoll will have a unique device ID for controlling the log files after an election. This ID is numeric and should be 6 characters. This number becomes the title of the log file (#####.log), and also is the first six characters of the provisional ID when using the auto provisional ID option in ExpressPoll unit. The hard sided ExpressPoll-5000 carrying case can be locked, and has a latch that can be secured with security (numbered) seals.

A strong security plan with processes that guide usage in a recommended best practice is in the administrator's manual. Two levels of passwords and smart cards are required to set certain configuration options. Election officials can mandate using simple passwords, pass phrases, or two-phase authentication using smart cards and passwords.

Additional password protections are provided at the server and these passwords can be set to expire.

Encrypted user logs are available to identify who has used and modified the system and devices; reports of all election functions performed on the system are available; and statistics can be captured of open, close, log-on, log-off by user ID.

The audit log file contains a time stamp of every transaction, providing the date and time of each voter processed. This log file can be encrypted using one of the following industry standard algorithms

- RC4
- AES-128 in OFB mode
- AES-128 in CCM mode
- AES-256 in OFB mode

The ExpressPoll-5000 USB ports can be physically covered to restrict tampering.

In the future, should electronic poll books require federal certification; the use of a dedicated electronic poll book enclosure will become increasingly important to meet federal certification requirements, as internal hardware components will have to remain consistent to meet the certification standards. A dedicated enclosure will allow jurisdictions to continue to meet these strict standards, while the use of an off-the-shelf computer will not, as replacement components for an off-the-shelf computer will not provide the consistency required to meet federal certification standards.

Method for Providing Data to Poll Book Watchers

The ExpressPoll-5000 comes with printers that will attach to each unit that will allow precinct election officials or officials at election central to print lists of voters who have voted by precinct.

Satellite Vote Centers

A key element to the success of the vote center concept has been the concept of satellite vote centers, which are sites open during the 29 day period prior to each Election Day. Satellite vote centers are places where any voter in the county may vote early absentee-in-person. As required under IC 3-11-10-26.3 and IC 3-11-18.1-4(16), Wabash County will designate at least two satellite vote centers, in addition to the County Clerk's office, and at least one of those sites will also be a vote center on Election Day and will be open for voting the two preceding Saturdays to Election Day. In vote center counties, early voting percentages have risen dramatically, allowing the fewer locations on Election Day itself to work well. To review early voting percentages by county and election, visit <http://www.in.gov/sos/elections/2400.htm>.

Poll Workers

Wabash County will require fewer poll workers to administer Election Day vote centers. However, the use of poll workers will increase on the two (2) Saturdays prior to an Election Day, in order to staff the satellite vote centers. Each satellite vote center and Election Day vote center will have at least one traditional precinct election board made up of an Inspector, at least two election judges of opposite parties, and then at least two clerks of opposite parties, depending on the election size and location of

the vote center. Furthermore, for the 2014 Election year each vote center will have two (2) additional workers to assist the clerks, judges and inspector, one from the Republican party and one from the Democrat party. The Wabash County Election Board will review this process on a year to year basis to determine if it is beneficial to continue having these two (2) additional workers at each vote center location. Their titles are Greeters/Assistants. That the new position of Greeter/Assistant shall be for the purpose of greeting voters, explaining the voting process for the vote center set-up, and asking voters to have their picture ID ready and available for the clerks. The Greeter/Assistant shall also assist the Inspector in any other manner the Inspector may feel is necessary on Election Day to better assist the voters and other poll workers. Training procedures for poll workers will remain largely the same with the exception that the first year of using e-poll books the training will be more individualized and concentrated to allow poll workers to become familiar with e-poll books.

The Republican and Democrat party chairs will provide a list of potential poll workers to the County Clerk's office to establish a pool of poll workers that the clerk's office will draw from. Said list shall be delivered to the Clerk's office on or about March 15th and September 15th of each election year in order to allow sufficient time for training prior to the opening of the satellite vote centers. If the Clerk does not receive the list of potential poll workers by said date, the Clerk shall contact and assign poll workers as needed.

Vote Center Layout

Vote centers will be set up differently based on location, but the general layout of a vote center in Wabash County will be as follows:

X = person

Voter Education Efforts

Wabash County has a full media and community outreach strategy that will involve press releases to widely circulated newspapers, television stations, and radio stations. In addition, we will use our county website (www.wabashcounty.in.gov) and the state's voter information website (www.IndianaVoters.com) to prepare Wabash County citizens for this change. Moreover, each registered voter will receive a postcard in the mail prior to the first election that Wabash County becomes a vote center county, informing them of this change and where each vote center is located.

VOTE CENTER AND SATELLITE VOTE CENTER LOCATIONS

Wabash County plans to utilize nine (9) vote center locations for the 2014 Election Cycle. Indiana Code 3-11-18.1-6 only requires one vote center per 10,000 active voters, but the Wabash County Election Board plans to provide one vote center per roughly 2,500 active voters.

The following are vote center locations to be open on Election Day:

1. Manchester Community Schools Administration Office – North Manchester
2. Roann Town Hall -- Roann
3. Manchester Intermediate School -- Laketon
4. Lagro Town Hall -- Lagro
5. Lafontaine Christian Church -- Lafontaine
6. Woodlawn Methodist Church -- Somerset
7. Zion Lutheran Church – Wabash
8. First United Methodist Church – Wabash
9. Wellbrooke Facility (Alber Street & 24) – Wabash

The following is a satellite vote center location(s) to be open **April 25, 2014 and May 3, 2014**:

1. Peabody Retirement Home (1 Saturday)
2. Timbercrest Retirement Home (1 Saturday)

The following is a satellite vote center location to be open **April 25, 2014 and May 3, 2014** and Election Day:

1. Lafontaine Christian Church

NOTE: Voters from every precinct may vote at any vote center location or satellite vote center location. Every ballot style for each precinct in Wabash County will be available at each vote center and each satellite vote center (Depending on the Election, the number of ballot styles varies greatly; therefore, this plan does not attempt to provide a specific number of ballot styles). Each vote center and early

vote center will be connected to all other voter centers or early vote centers (as well as to the County Election Board) via electronic poll books connected via secured internet lines. At least one electronic poll book terminal will be available at each location. Each location, depending on the election, will also have at least one precinct election board, meaning one inspector, at least two judges of opposite parties, and at least two poll clerks of opposite parties. (See Appendix A for Certification that each location above is accessible to voters with disabilities as required by the Help American Vote Act and the Americans with Disabilities Act.)

SECURITY

Local Preparation and Response

The Wabash County Commissioners have worked closely with the local emergency management director, the county sheriff, and local police and fire stations to ensure Wabash County is prepared for emergencies. In addition, the Wabash County Commissioners will be in close communication with the County Election Board should any emergency occur on or surrounding the election process.

In this endeavor to be prepared for an emergency that could occur on or surrounding an Election Day, Wabash County takes the following steps prior to each Election Day:

- Review of IC 3-11-8-3.2 which outlines procedures for changing polling locations.
- Review of state's Quantity Purchasing Agreements (QPA) whereby Wabash County may buy or lease emergency generators and other supplies.
- Contact is made with power companies to ensure all vote centers have power on Election Day.
- Election Systems and Software will have employees at the Courthouse and in the field on Election Day in the event of any disruption.
- In the event of a power failure at a vote center, the voting machines and e-poll books will be switched automatically to a battery backup. (NOTE: Applies if using ES&S technology.)
- In the event that the internet is inaccessible at a vote center location, the eligibility of a voter will be ascertained from records maintained by the Wabash County Voter Registration office via telephone/cell phone.

I.C. 3-11-18.1-4 COMPLIANCE CHECKLIST

Explanation

The following 17 items are the requirements for a vote center plan as defined in Indiana Code 3-11-18.1-4. Following each of the 17 requirements a page number listed in red type references where in this Wabash County Vote Center Plan the particular requirement(s) is met.

(1) The total number of vote centers to be established. See Page 8

(2) The location of each vote center. See Page 8

(3) The effective date of the order. The order shall take effect immediately upon the filing of the order with the Indiana Election Division, pursuant to I.C. 3-11-18.1-8.

(4) The following information according to the computerized list (as defined in IC 3-7-26.3-2) as of the date of the order: (A) The total number of voters within the county. (B) The number of active voters within the county. (C) The number of inactive voters within the county. See Appendix D

(5) For each vote center designated under subdivision (2), a list of the precincts whose polls will be located at the vote center consistent with section 13 of this chapter. See Page 8 "Note" for explanation that all precincts will be located at all vote centers. See Appendix D for a list of current county precincts.

(6) For each vote center designated under subdivision (2), the number of precinct election boards that will be appointed to administer an election at the vote center. See Page 6 & 7

(7) For each precinct election board designated under subdivision (6), the number and name of each precinct the precinct election board will administer consistent with section 13 of this chapter. See Page 8 "Note" for explanation that all precincts will be located at all vote centers. Therefore, all precinct election boards will administer elections for all precincts in the county. See Appendix D for a list of current county precincts.

(8) For each vote center designated under subdivision (2), the number and title of the precinct election officers who will be appointed to serve at the vote center. See Page 6 & 7. Titles for precinct election officials will remain the same.

(9) For each vote center designated under subdivision (2): (A) the number and type of ballot variations that will be provided at the vote center; and (B) whether these ballots will be: (i) delivered to the vote center before the opening of the polls; or (ii) printed on demand for a voter's use. See Page 8 "Note" for the explanation that every ballot style will be available at each satellite vote center and each vote center. The exact number of ballot styles will vary by election. See Page 9 "The Voting Equipment" for a description of how ballots will be provided to voters. Provisional ballots will be issued [Insert Provisional Ballot process description].

(10) A detailed description of any hardware, firmware, or software used: (A) to create an electronic poll list for each precinct whose polls are to be located at a vote center; or (B) to establish a secure electronic connection between the county election board and the precinct election officials administering a vote center. See Pages 4 & 5 for a complete description of the e-poll book equipment and procedures to be used in Wabash County.

(11) A description of the equipment and procedures to be used to ensure that information concerning a voter entered into any electronic poll list used by precinct election officers at a vote center is immediately accessible to: (A) the county election board; and (B) the electronic poll lists used by precinct election officers at all other vote centers in the county. See Pages 4 & 5 for a complete description of the e-poll book equipment and procedures to be used in Wabash County.

(12) For each precinct designated under subdivision (5), the number of electronic poll lists to be provided for the precinct. Each vote center will have every precinct's poll list in electronic form. At least one electronic poll book will be available at each vote center.

(13) The security and contingency plans to be implemented by the county to do all of the following: (A) Prevent a disruption of the vote center process. (B) Ensure that the election is properly conducted if a disruption occurs. (C) Prevent access to an electronic poll list without the coordinated action of two (2) precinct election officers who are not members of the same political party. See Pages 9 for a description of Wabash County's security process. See Page 5 for a description of the security relating to the electronic poll book that will be used in Wabash County.

(14) A certification that the vote center complies with the accessibility requirements applicable to polling places under IC 3-11-8. See Appendix A.

(15) A sketch depicting the planned layout of the vote center, indicating the location of: (A) equipment; and (B) precinct election officers; within the vote center. See Page 7.

(16) The total number and locations of satellite offices to be established under IC 3-11-10-26.3 at vote center locations designated under subdivision (2) to allow voters to cast absentee ballots in accordance with IC 3-11. However, a plan must provide for at least one (1) vote center to be established as a satellite office under IC 3-11-10-26.3 on the two (2) Saturdays immediately preceding an election day. See Page 8.

(17) The method and timing of providing voter data to persons who are entitled to receive the data under this title. Data shall be provided to all persons entitled to the data without unreasonable delay. See Page 6.
