IMPORTANT INFORMATION. Self-directed investments are the sole responsibility of the account-owner. Carefully weigh the advantages and disadvantages of investing your HSA funds before doing so. Investment products are not federally-insured; may lose value and are not a deposit account. Investment accounts are not obligations of the bank OR DEVEVIR and are not guaranteed.

Performance data and ratings represent past performance and are not a guarantee of future results. Investment returns and principal value will fluctuate and investors' shares, when sold, may be worth more or less than their original cost. Investment losses which are replaced are subject to the annual contribution limits of the HSA.

In selecting and classifying the above group of mutual funds, Old National Bank's investment advisor, DEVENIR, does not intend to provide any personalized investment advice in connection with this program. Neither Old National Bank nor Devenir is making a recommendation to individual health savings accountholders that any of the mutual fund investment options are, or would be a suitable or appropriate investment for you. That decision is yours.

Before you invest in any particular mutual fund, you should carefully review the fund's prospectus and consider its objectives, associated risks and any other fees or expenses that may apply. Investing entails the risk of loss of principal. You can find a fund's prospectus by accessing the prospectus link (P) on this worksheet. The mutual fund performance data quoted represents past performance, which is no guarantee of future results. Current performance may be higher or lower than the performance data quoted. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be more or less than their original cost. An investment in a money market fund is not insured by the FDIC or any other government agency. Although money market funds seek to preserve capital, it is possible to lose money by investing in these funds. All mutual funds are purchased at NAV without a front end load. Each fund company may charge a short-term redemption fee if held for less than the timeframe listed in the prospectus.
